OCR A Level PE Philip Allan

This book prepares students for all the elements of the OCR AS exam. It gives the who, what, where, and even the why of each of the core studies. It also looks at some of the work that followed the studies.

Specifically it covers: Core studies: an abstract of each study plus ample details of the aims, method, results and conclusions. Guidance is given on how each study can be evaluated and a wealth of extra materials provided for each study e" practical activities, discussion ideas, multiple-choice and exam-style questions, diagrammatic summaries, further reading and video links. Background to each core study: information about related research before and after the study; and biographical details of the researcher(s). Key issues: sixteen issues

are discussed to cover the themes of the course and prepare students for the long answer questions. A

'Psychological Investigations' chapter helps students to understand research methods in psychology, necessary for the Psychological Investigations exam and also for understanding the core studies themselves.

Exam guidance: short and long answer exam-style questions answered by students with examiner(s) comments.

The book is presented in magazine-style spreads to aid the learning process, and has been thoroughly revised to match the requirements of the new OCR specification.

The book(s) accompanying website contains Answers to all exam questions. Suggested evaluations.

My Revision Notes: OCR GCSE (9-1) Psychology Philip Allan

Teaching Psychology 14-19 - first published as Teaching Post-16 Psychology - is a core text for all training psychology teachers, as well as experienced teachers engaged in further study and professional development. Taking a reflective approach, Matt Jarvis explores key issues and debates against a backdrop of research and theory, and provides guidance on practical ideas intended to make life in the psychology classroom easier. With an emphasis on the application of psychology to teaching psychology, it clearly and comprehensively covers the knowledge essential to develop as a successful teacher. Key issues considered include: The appeal of psychology and what the subject can offer students The psychology curriculum and advice on how to choose a syllabus Principles of effective teaching and learning Teaching psychological thinking Differentiated psychology teaching Choosing and developing resources Using technology effectively. With a new chapter exploring the role of practical work in the post-coursework era, this second edition considers psychology teaching across the 14-19 age range and has been updated in light of the latest research, policy and practice in the field. Teaching Psychology 14-19 is

an essential text for all those engaged in enhancing their understanding of teaching psychology in the secondary school.
