Cambridge IGCSE (tm) Additional Maths Teacher's Guide Swipe Educational Solutions This book explores political expression of members of Generation Z old enough to vote in 2018 and 2020 on issues and movements including MeToo, Supreme Court nominations, March for Our Lives, immigration and family separation, and Black Lives Matter. Since generational dividing lines blur, we study 18 to 25-year-olds, capturing the oldest members of Generation Z along with the youngest Millennials. They share similarities both in their place in the life cycle and experiences of potentially defining events. Through examining some movements led by young adults and others led by older generations, as well as issues with varying salience, core theories are tested in multiple contexts, showing that when young adults protest or post about movements they align with, they become mobilized to participate in other ways, too, including contacting elected

officials, which heightens the likelihood of their voices being heard in the halls of power. Perfect for students and courses in a variety of departments at all levels, the book is also aimed at readers curious about contemporary events and emerging political actors. Essential Economics for Cambridge IGCSE® & O Level Collins

Many agree that rapid urbanization in China in the late 20th and early 21st centuries is a mega process significantly reshaping China and the global economy. China's urbanization also carries a certain mystique, which has long fascinated generations of scholars and journalists alike. As it has turned out, many of the asserted Chinese feats are mostly fancied claims or gross misinterpretations (of statistics, for example). There does exist, however, an urbanization that displays rather uncommon "Chinese" characteristics that remain to inadequately understood. Building on his three decades of careful research, Professor Kam Wing Chan expertly dissects the complexity of China's hukou system, migration, urbanization and their interrelationships in this set of journal articles published in the last ten years. These works range from seminal papers on Chinese urban definitions and statistics; and broad-perspective analysis of the hukou

system of its first semi-centennial; to examinations of migration trends and geography; and critical evaluations of China's 2014 urbanization blueprint and hukou reform plan. This convenient assemblage contains many of Chan's recent important works. Together they also form a relatively coherent set on this topic. They are essential readings to anyone serious about gaining a true understanding of the prodigious urbanization in contemporary China.
