Sirius, although the logical successor to Odd John, deals with quite another being — an alien intelligence, artificially produced, a dog with superhuman mentality, who is not only superior to his own kind, but rejected by those with whom he has most in common. Stapledon uses his powers — intellectual, imaginative, and observant — to detail the conflict in its very "human" form.

Odd John and Sirius are something else besides explorations of superbeings. Stapledon is capable of a great deal of humor and tongue-in-cheek description. If his writing, as he says in the subtitle to Odd John, is between jest and earnest, his sympathies are divided between the conflicting forces of man and superman.

Olaf Stapledon - Wikipedia

The novel Sirius by Olaf Stapledon imagines what would happen if a scientist created a super-intelligent dog. Set in Wales and, briefly, Cambridge and London during the years before and during World War II this is a realistic portrayal of the creation of just such a dog.
