Guns, Germs, and Steel: The Fates of Human Societies (20th Anniversary Edition) Literary Licensing, LLC

An award-winning scientist offers his unorthodox approach to childrearing:

“Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your

kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear

children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

These two timeless epics by the ancient Greek poet—each translated by a world-renowned author—have captured the Western imagination for millennia. The Iliad: Alexander Pope “works miracles” in this beautiful verse translation of Homer’s epic poem set near the end of the Trojan War. It centers on a quarrel between the

invading Greek king Agamemnon and his greatest asset in battle, the warrior Achilles. From this conflict, Homer weaves a tale of warring nations, vengeful gods, and the terrible consequences of prideful rage (The New York Times). The Odyssey: The Trojan War is over and Odysseus, the king of Ithaca, embarks to return home. But he is cursed by the god Poseidon to wander the perilous earth for ten years before reaching his destination. Homer's epic adventure of survival by wit and battling mythical creatures is presented here in a stirring prose translation by Samuel Butler.

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful"

(William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, Guns, Germs, and Steel chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.
