Spectrum of Thoughts In Liberating Oedipus?: Psychoanalysis as Critical Theory, Dr. Filip Kovacevic demonstrates how psychoanalytic theory can join political theory in designing alternative political norms and values. Detailing the thoughts of major psychologists including Sigmund Freud, Jacques Lacan, and Alain Badiou, this book offers a new approach to traditional

---

Lacanian theory. Kovacevic's emphasis on Lacanian psychoanalysis is especially relevant due to the modern challenges of failed globalization and the subsequent terrorist reactions. Kovacevic proves that political practice without an emancipatory psychology to guide it is potentially dangerous. *Liberating Oedipus?* is a critical text for scholars of political theory and those interested in the history of ideas. A&C Black Lukácsian film theory and cinema explores Georg Lukács' writings on film. The Hungarian Marxist critic Georg Lukács is primarily known as a literary theorist, but he also wrote extensively on the cinema. These writings have remained little known in the English-speaking world because the great majority of them have never actually been translated into English – until now. Aitken has gathered together the most important essays and the translations appear here, often for the first time. This book thus makes a decisive contribution to understandings of Lukács within the field of film studies, and, in doing so, also challenges many existing preconceptions concerning his theoretical position. For example, whilst Lukács' literary theory is well known for its repudiation of naturalism, in his writings on film Lukács appears to advance a theory and

---

practice of film that can best be described as naturalist. Lukácsian film theory and cinema is divided into two parts. In part one, Lukács' writings on film are explored, and placed within relevant historical and intellectual contexts, whilst part two consists of the essays themselves. This book will be of considerable interest to scholars and students working within the fields of film studies, literary studies,

intellectual history, media and cultural studies. It is also intended to be the final volume in a trilogy of works on cinematic realism, which includes the author's earlier European film theory and cinema (2001), and Realist film theory and cinema (2006). **Jacques Lacan** Berghahn Books The bestselling workbook and grammar guide, revised and updated! At the turn of the century, Sigmund Freud's investigation of the mind represented a particular journey into mental illness, but it was not the only exploration of this 'territory' in the Austro-Hungarian Empire. Sanatoriums were the new tourism destinations, psychiatrists were collecting art works produced by patients and writers were developing innovative literary techniques to convey a character's interior life. This

---

collection of essays uses the framework of journeys in order to highlight the diverse artistic, cultural and medical responses to a peculiarly Viennese anxiety about the madness of modern times. The travellers of these journeys vary from patients to doctors, artists to writers, architects to composers and royalty to tourists; in engaging with their histories, the contributors reveal the different ways in which madness was experienced and represented in 'Vienna 1900'.

This book explores the answers to fundamental questions about the human mind and human behaviour with the help of two ancient texts. The first is Oedipus Rex

(Oedipus Tyrannus) by Sophocles, written in the 5th century BCE. The second is human DNA, with its origins around 4 billion years ago, and continuously revised by chance and evolution. With Sophocles as a guide, the authors take a journey into the Genomic era, an age marked by ever-expanding insights into the human genome. Over the course of this journey, the book explores themes of free will, fate, and chance; prediction, misinterpretation, and the burden that comes with knowledge of the future; self-fulfilling and self-defeating prophecies; the forces that

---

contribute to similarities and differences among people; roots and lineage; and the judgement of oneself and others. Using Oedipus Rex as its lens, this novel work provides an engaging overview of behavioural genetics that demonstrates its relevance across the humanities and the social and life sciences. It will appeal in particular to students and scholars of genetics, education, psychology, sociology, and law.
