Mutineer's Moon Macmillan The latest novel in the New York Times- bestselling series begun

with Off Armageddon Reef, By Schism Rent Asunder, and By Heresies Distressed. Young Cayleb Ahrmahk has accomplished things few people could even dream of. Not yet even thirty years old, he's won the most crushing naval victories in human history. He's smashed a hostile alliance of no less than five principedoms and won the hand of the beautiful young Queen Sharleyan of Chisholm. Cayleb and Sharleyan have created the Charisian Empire, the greatest naval power in the history of Safehold, and they've turned Charis into a place of refuge for all who treasure freedom. Their success may prove short-lived. The Church of God Awaiting, which controls most of Safehold, has decreed their destruction. Mother Church's entire purpose is to prevent the very things to which Charis is committed. Since the

first attempt to crush the heretics failed, the Church has no choice but to adopt some of the hated Charisian innovations for themselves. Soon a mighty fleet will sail against Cayleb, destroying everything in its path. But there are still matters about which the Church knows nothing, including Cayleb and Sharleyan's adviser, friend, and guardian- the mystic warrior-monk named Merlin Athrawes. Merlin knows all about battles against impossible odds, because he is in fact the cybernetic avatar of a young woman named Nimue Alban, who died a thousand years before. As Nimue, Merlin saw the entire Terran Federation go down in fire and slaughter at the hands of a foe it could not defeat. He knows that Safehold is the last human planet in existence, and that the stasis the Church was created to enforce will be the human race's death sentence if it is allowed to

stand. The juggernaut is rumbling down on Charis, but Merlin Athrawes and a handful of extraordinary human beings stand in its path. The Church is about to discover just how potent the power of human freedom truly is, in David Weber's A Mighty Fortress. Safehold Series 1. Off Armageddon Reef 2. By Schism Rent Asunder 3. Mighty Fortress and How Firm a Foundation. The Church of God Awaiting's triumph over Charis was inevitable. Despite its prosperity, the Charis was a single, small island realm. It boasted less than two percent of the total population of Safehold. How could it possibly resist total destruction? The Church had every reason to be confident of a swift, crushing victory, an object lesson to other rebels. But Charis had something far more powerful than simple numbers. It had a king, a crown prince, and a navy prepared to die where they stood in its defense. It had the Brethren of Saint Zherneau, who knew the truth about Safehold's founding. Who knew that the Church of God Awaiting was a monstrous lie. And it had Merlin Athrawes, last survivor of long-vanished Earth. Merlin, the cybernetic avatar of a woman dead over a thousand years, who was determined to break the Church's grip upon the human mind and soul. So after eight years of war, it is not Charis but the Church that stands upon the brink of defeat. But the Church still commands immense resources, and — faced with the unthinkable — it's decided that it, too, must embrace the forbidden technology which has carried Charis so far. In the end, it is simple, for only one can survive. The lines are drawn, the navies and armies have been raised, and all of Safehold is poised for the final battle between those who believe in freedom and those who would crush it forever.

The island empire of

Fending off the wounded Church, Charis has drawn more and more of the countries of Safehold to the cause of independence and self-determination. But at a heavy cost in bloodshed and loss--a cost felt by nobody more keenly than Merlyn Athrawes. The wounded Church is regrouping. Its armies and resources are vast. The fight for humanity's future isn't over, and won't be over soon...

So when Travis enlisted in the Royal Manticoran Navy, he thought he'd finally found the structure he'd always wanted so desperately. But life in the RMN isn't exactly what he expected. Boot camp is rough and frustrating; his first ship assignment lax and disorderly; and with the Star Kingdom of Manticores still recovering from a devastating plague, the Navy is possibly on the

edge of budgetary extinction. The Star Kingdom is a minor nation among the worlds of the Diaspora, its closest neighbors weeks or months away, with little in the way of resources. With only modest interstellar trade, no foreign contacts to speak of, a plague-ravaged economy to rebuild, and no enemies looming at the hyper limit, there are factions in Parliament who want nothing more than to scrap the Navy and shift its resources and manpower elsewhere. But those factions are mistaken. The universe is not a safe place. Travis Long is about to find that out. At the publisher's request, this title is sold without DRM (Digital Rights Management). The mutiny was never

Dahak has been helplessly waiting as the descendants of the loyal crew regressed while the mutineers maintained control of technology that kept them alive as the millennia passed. But now Dahak's sensors indicate that the enemy that devastated the Imperium so long ago has returned-and Earth is in their path. For the sake of the planet, Dahak must mobilize its defenses. And that it cannot do until the mutineers are put down. So Dahak has picked Colin MacIntyre to be its new captain. Now MacIntyre must mobilize humanity to destroy the mutineers once and for all-or Earth will become a cinder in the path of galactic conquest. In New York Times- bestselling science fiction epic *Out of the Dark*, Earth beat back an alien invasion. Now we've got to make sure they don't come back, in *Into the Light*. The Shongairi conquered Earth. In mere minutes, half the human race died, and our cities lay in shattered ruins. But the Shongairi didn't expect the survivors' tenacity. And, crucially, they didn't know that Earth harbored two species of intelligent, tool-using bipeds. One of them was us. The other, long-lived and lethal, was hiding in the mountains of eastern Europe, the subject of fantasy and legend. When they emerged and

made alliance with humankind, the invading aliens didn't stand a chance. Now Earth is once again ours. Aided by the advanced tech the aliens left behind, we're rebuilding as fast as we can. Meanwhile, a select few of our blood-drinking immortals are on their way to the Shongairi homeworld, having commandeered one of the alien starships...the planet-busting kind. The impossible has spawned the unthinkable. In 2021, a quantum military experiment goes horrifically wrong. A multinational taskforce of ultra-modern warships is suddenly transported back in time to 1942 right into the path of the US naval battle group

bound for Midway Atoll. History is rewritten in an instant as the future smashes into the past, and high-tech hardware goes head to head with World War Two technology. In the chaos that ensues, thousands are killed, but the maelstrom has only just begun. The veterans of Pearl Harbour have never seen a helicopter, or a cruise missile - let alone nanotechnology, ceramic bullets, and F22 Raptor stealth jetfighters. Allied and Axis forces are then caught in a desperate struggle to gain the upper hand - each hoping to tip the balance with a fist full of twenty first century firepower. What

Someone is assassinating the leaders of both the Star Kingdom of Manticore and the recently liberated former slave planet of Torch. Though most believe the Republic of Haven is behind the murders, Anton Zilwicki and Havenite secret agent Victor Cachat believe there is another sinister player behind the scenes. Queen Berry of Torch narrowly escaped one assassination attempt, and a security officer from Beowulf has been assigned to protect her, a task complicated by the young monarch's resentment of bodyguards, and the officer's growing attachment to her. Meanwhile, powerful forces in the Solarian

League are maneuvering against each other to gain the upper hand, not realizing or, perhaps, not caring that their power struggle is threatening the League's very existence and could plunge the galaxy into war. Outside its borders, the Thirty Years War continues to rage. Within, it is beset by financial crisis as well as the political and social tensions between the democratic ideals of the 20th-century Americans and the aristocracy which continues to rule the roost in the CPE as everywhere in Europe. Worst of all, the CPE has aroused the implacable hostility of Cardinal Richelieu, the effective ruler of France. The entire world is thrilled by the discovery of a new Earthlike planet. Advance imaging shows that the planet has oceans of liquid water and a breathable oxygen-rich atmosphere. Eager to gain more information, a human exploration

team is soon dispatched to explore the planet, now nicknamed New Earth. All of the explorers understand that they are essentially on a one-way mission. The trip takes eighty years each way, so even if they are able to get back to Earth, nearly 200 years will have elapsed. They will have aged only a dozen years thanks to cryonic suspension, but their friends and family will be gone and the very society that they once knew will have changed beyond recognition. The explorers are going into exile, and they know it. They are on this mission not because they were the best available, but because they were expendable. Upon landing on the planet they discover something unexpected: New Earth

is inhabited by a small group of intelligent creatures who look very much like human beings. Who are these people? Are they native to this world, or invaders from elsewhere? While they may seem inordinately friendly to the human explorers, what are their real motivations? What do they want? Moreover, the scientists begin to realize that this planet cannot possibly be natural. They face a startling and nearly unthinkable question: Could New Earth be an artifact?
