Gardener's Soul celebrates
all the magic of gardening-
the feeling of satisfaction
that comes from creating
something from nothing; the
physical and spiritual
renewal the earth provides;

and the special moments shared with friends and family only nature can bestow.

The Entropy Effect

Simon and Schuster
Glenn Beck, the New York Times bestselling author of The Great Reset—issues a startling challenge to people on both sides of the aisle: America is addicted to outrage, we're at the height of a twenty-year bender, and we need an intervention. In the instant New York Times bestseller, Glenn Beck addresses how America has become more and more divided—both politically and

socially. Americans are now less accepting, less forgiving, and have lost faith in many of the country's signature ideals. They are quick to point a judgmental finger at the opposing party, are unwilling to doubt their own ideologies, and refuse to have any self-awareness whatsoever. Beck states that this current downward spiral will ultimately lead to the destruction of everything America has fought so hard to preserve. This is not simply a Republican problem. This is not simply

a Democratic problem. This is everyone's burden, and we need to think like recovering addicts and change. Mirroring traditional twelve-step programs, Beck outlines the actions that Americans must follow in order to prevent a farther decline down this current path of hostile bitterness. Drawing from his own life experiences and including relevant examples for each step, he is able to lead us to a more hopeful, happy future. From learning how to

believe in something greater than ourselves to understanding the importance of humility, each chapter encourages self-reflection and growth. Addicted to Outrage is a timely and necessary guide for how Americans—right and left—must change to survive.

Leonard IDW Publishing
A New York Times Best Mystery Novel of 2021 Set in 1944 Chicago, Edgar Award-winner Naomi Hirahara's eye-opening and poignant new mystery, the story of a young woman searching for the truth about her revered older sister's death, brings to focus the struggles of one Japanese American family released from mass incarceration at Manzanar during World War II. Chicago, 1944: Twenty-year-old Aki Ito

and her parents have just been released from Manzanar, where they have been detained by the US government since the aftermath of Pearl Harbor, together with thousands of other Japanese Americans. The life in California the Itos were forced to leave behind is gone; instead, they are being resettled two thousand miles away in Chicago, where Aki's older sister, Rose, was sent months earlier and moved to the new Japanese American neighborhood near Clark and Division streets. But on the eve of the Ito family's reunion, Rose is killed by a subway train. Aki, who worshipped her sister, is stunned. Officials are ruling Rose's death a suicide. Aki cannot believe her perfect, polished, and optimistic sister would end her life. Her instinct tells her there is much more to the story, and she knows she is the only person who could ever learn the truth. Inspired by historical events, Clark and Division infuses an atmospheric and heartbreakingly real crime with rich period details and delicately wrought personal

stories Naomi Hirahara has gleaned from thirty years of research and archival work in Japanese American history. *Girl Town* Simon and Schuster This "elegant and haunting novel of war, art and memory" (The Independent) award-winning novel from the acclaimed author of *The Gift of Rain* follows the only Malaysian survivor of a Japanese wartime camp as she begins working for an exiled former gardener of the Emperor. Malaya, 1951. Yun Ling Teoh, the scarred lone survivor of a brutal Japanese wartime camp, seeks solace among the jungle-fringed tea plantations of Cameron Highlands. There she discovers Yugiri, the only Japanese garden in Malaya, and its owner and creator, the enigmatic Aritomo, exiled former gardener of the emperor of Japan. Despite her hatred of the Japanese, Yun Ling seeks to engage Aritomo to create a garden in memory of her sister, who died in the camp. Aritomo refuses but agrees to accept Yun Ling as his apprentice "until the monsoon comes." Then she can design a garden for herself. As the months

pass, Yun Ling finds herself intimately drawn to the gardener and his art, while all around them a communist guerilla war rages. But the Garden of Evening Mists remains a place of mystery. Who is Aritomo and how did he come to leave Japan? And is the real story of how Yun Ling managed to survive the war perhaps the darkest secret of all?

Shatner Rules Soho Press

In the summers of the early 1970s, Morris Ardoin and his siblings helped run their family's roadside motel in a hot, buggy, bayou town in Cajun Louisiana. The stifling, sticky heat inspired them to find creative ways to stay cool and out of trouble. When they were not doing their chores—handling a colorful cast of customers, scrubbing motel-room toilets, plucking chicken bones and used condoms from under the beds—they played canasta, an old ladies' game that provided

them with a refuge from the sun and helped them avoid their violent, troubled father. Morris was successful at occupying his time with his siblings and the children of families staying in the motel's kitchenette apartments but was not so successful at keeping clear of his father, a man unable to shake the horrors he had experienced as a child and, later, as a soldier. The preteen would learn as he matured that his father had reserved his most ferocious attacks for him because of an inability to accept a gay or, to his mind, broken, son. It became his dad's mission to "fix" his son, and Morris's mission to resist—and survive intact. He was aided in his struggle immeasurably by the love and encouragement of a selfless and generous grandmother, who provides his story with much of its

warmth, wisdom, and humor. There's also suspense, awkward romance, naughty French lessons, and an insider's take on a truly remarkable, not-yet-homogenized pocket of American culture.

Chicken Soup for the Gardener's Soul Beyond Words/Atria Books

Star Trek legend and veteran author William Shatner discusses the meaning of life, finding value in work, and living well whatever your age. "I have always felt," William Shatner says early in his newest memoir, that "like the great comedian George Burns, who lived to 100, I couldn't die as long as I was booked." And Shatner is always booked. Still, a brief health scare in 2016 forced him to take stock.

After mulling over the lessons he's learned, the places he's been, and all the miracles and strange occurrences he's witnessed over the course of an enduring career in Hollywood and on the stage, he arrived at one simple rule for living a long and good life: don't die. It's the only one-size-fits-all advice, Shatner argues in *Live Long and...: What I Learned Along the Way*, because everyone has a unique life—but, to help us all out, he's more than willing to share stories from his unique life. With a combination of pithy humor and thoughtful vulnerability, Shatner lays out his journey from childhood to peak stardom and all the bumps in the road. (Sometimes the

literal road, as in the case of his 2,400-mile motorcycle trip across the country with a bike that didn't function.) William Shatner is one of our most beloved entertainers, and he intends never to stop entertaining. His funny, provocative, and poignant reflections offer an unforgettable read about a remarkable man.

Academic Writing for Graduate Students

Academic Press

In 1942, Bill Manbo (1908-1992) and his family were forced from their Hollywood home into the Japanese American internment camp at Heart Mountain in Wyoming. While there, Manbo documented both the bleakness and beauty of his surroundings, using Kodachrome film, a

technology then just seven years old, to capture community celebrations and to record his family's struggle to maintain a normal life under the harsh conditions of racial imprisonment. Colors of Confinement showcases sixty-five stunning images from this extremely rare collection of color photographs, presented along with three interpretive essays by leading scholars and a reflective, personal essay by a former Heart Mountain internee. The subjects of these haunting photos are the routine fare of an amateur photographer: parades, cultural events, people at play, Manbo's son. But the images are set against the backdrop of the barbed-wire enclosure

surrounding the Heart Mountain Relocation Center and the dramatic expanse of Wyoming sky and landscape. The accompanying essays illuminate these scenes as they trace a tumultuous history unfolding just beyond the camera's lens, giving readers insight into Japanese American cultural life and the stark realities of life in the camps. Also contributing to the book are: Jasmine Alinder is associate professor of history at the University of Wisconsin-Milwaukee, where she coordinates the program in public history. In 2009 she published *Moving Images: Photography and the Japanese American Incarceration* (University of Illinois Press). She has also published articles

and essays on photography and incarceration, including one on the work of contemporary photographer Patrick Nagatani in the newly released catalog *Desire for Magic: Patrick Nagatani--Works, 1976-2006* (University of New Mexico Art Museum, 2009). She is currently working on a book on photography and the law. Lon Kurashige is associate professor of history and American studies and ethnicity at the University of Southern California. His scholarship focuses on racial ideologies, politics of identity, emigration and immigration, historiography, cultural enactments, and social reproduction, particularly

as they pertain to Asians in the United States. His exploration of Japanese American assimilation and cultural retention, *Celebration and Conflict: A History of Ethnic Identity and Festival, 1934-1990* (University of California Press, 2002), won the History Book Award from the Association for Asian American Studies in 2004. He has published essays and reviews on the incarceration of Japanese Americans and has coedited with Alice Yang Murray an anthology of documents and essays, *Major Problems in Asian American History* (Cengage, 2003). Bacon Sakatani was born to immigrant Japanese parents in El Monte, California, twenty miles

east of Los Angeles, in 1929. From the first through the fifth grade, he attended a segregated school for Hispanics and Japanese. Shortly after Pearl Harbor, his family was confined at Pomona Assembly Center and then later transferred to the Heart Mountain Relocation Center in Wyoming. When the war ended in 1945, his family relocated to Idaho and then returned to California. He graduated from Mount San Antonio Community College. Soon after the Korean War began, he served with the U.S. Army Engineers in Korea. He held a variety of jobs but learned computer programming and retired from that career in 1992. He has been active in Heart

Mountain camp activities and with the Japanese American Korean War Veterans.

Feature Engineering for Machine Learning

"O'Reilly Media, Inc."

After a reality bomb goes off at the first ever ShatnerCon, all of the characters ever played by William Shatner are suddenly sucked into our world. Their mission: hunt down and destroy the real William Shatner. Featuring: Captain Kirk, TJ Hooker, Denny Crane, Priceline Shatner, Cartoon Kirk, Rescue 9-1-1 Shatner, singer Shatner, and many more. No costumed congoer will be spared in their wave of destruction, no red shirt will make it out alive, and not even the Klingons will be able to stand up to a deranged Captain Kirk with a light saber. But these Shatner- clones are about

to learn a hard lesson . . . that the real William Shatner doesn't take crap from anybody. Not even himself.

The celebrated animated series comes to book shelves! Revisit the inhabitants of Equestria and learn about the magic that friendship brings in this adaptation of the television series' fifth season finale! This volume adapts the two-

part episode 'The Cutie Re-Mark' in an original graphic novel.

Colors of Confinement

Source Point Press

Diana got hurt—a lot—and she's decided to deal with this fact by purchasing a life-sized robot boyfriend. Mary and La-La host a podcast about a movie no one's ever seen. Kelly has dragged her friend Beth out of her comfort zone—and into a day at the fantasy market that neither of them will forget.

Girl Town collects the Ignatz Award-winning stories "Radishes" and "Diana's Electric Tongue" together with several other tales of young adulthood and the search for connection. Here are her most acclaimed mini-comics

and anthology contributions, enhanced with new colors and joined by brand-new work. Bold, infatuated, wounded, or lost, Nowak's girls shine with life and longing. Their stories—depicted with remarkable charm and insight—capture the spirit of our time.

Live Long And . . .

Simon and Schuster Relive your favorite episodes of the beloved My Little Pony animated cartoon in this graphic novel adaptation featuring season seven's "Shadowplay!" When Sunburst discovers the lost journal of Star Swirl the Bearded, he shares it with Twilight Sparkle. Together, they find out how the sorcerer and several other of Equestria's heroes,

known as the Pillars of Old Equestria, sacrificed themselves to defeat the evil Pony of Shadows.

After researching more about the heroes' disappearance, Twilight believes that the Pillars are still alive and trapped in limbo and becomes obsessed with trying to free them—but that might not be such a good idea!

My Little Pony: Twilight's Kingdom Penguin

The autobiography of Star trek's Mr. Sulu.

They Called Us Enemy - Expanded Edition Simon and Schuster

The brain is the most complex organ in our body. Indeed, it is perhaps the most complex structure we have ever encountered in nature. Both structurally and functionally, there are many peculiarities that differentiate the brain from

all other organs. The brain is our connection to the world around us and by governing nervous system and higher function, any disturbance induces severe neurological and psychiatric disorders that can have a devastating effect on quality of life. Our understanding of the physiology and biochemistry of the brain has improved dramatically in the last two decades. In particular, the critical role of cations, including magnesium, has become evident, even if incompletely understood at a mechanistic level. The exact role and regulation of magnesium, in particular, remains elusive, largely because intracellular levels are so difficult to routinely quantify. Nonetheless, the importance of magnesium to normal central nervous system activity is self-evident given the complicated homeostatic mechanisms that maintain the concentration of this cation within strict limits essential for normal physiology and metabolism. There is also considerable accumulating evidence to suggest alterations to some brain functions in both normal and pathological conditions may be linked to alterations in local magnesium concentration. This book, containing chapters written by some of the foremost experts in the field of magnesium research, brings together the latest in experimental and clinical magnesium research as it relates to the central nervous system. It offers a complete and updated view of magnesiums involvement in central nervous system function and in so doing, brings together two main pillars of contemporary neuroscience research,

namely providing an explanation for the molecular mechanisms involved in brain function, and emphasizing the connections between the molecular changes and behavior. It is the untiring efforts of those magnesium researchers who have dedicated their lives to unraveling the mysteries of magnesium's role in biological systems that has inspired the collation of this volume of work.

Damned Cursed Children

Top Shelf Productions

The celebrated animated series comes to bookshelves! This series adapts the most beloved My Little Pony cartoon episodes into easy-to-read graphic novels! Now that Twilight Sparkle is a full-fledged Princess of Equestria, what's her new purpose? The answer lies in the magical Cutie Map.

Following it leads Twilight, Rainbow Dash, and the others to a village where everypony's given up their Cutie Marks...and they seem to be happier because of it! Will the village leader, Starlight Glimmer, convince our ponies to give up their marks too? Revisit the inhabitants of Equestria and learn about the magic that friendship brings in this comic book adaptation of the two-part episode "The Cutie Map!"

The Year of the Dog

Little, Brown Books for Young Readers

NEW YORK TIMES

BESTSELLER "It's

undeniably thrilling to find words for our strangest feelings...Koenig casts light into lonely corners of human experience...An enchanting book. " —The Washington Post A truly original book in every

sense of the word, The Dictionary of Obscure Sorrows poetically defines emotions that we all feel but don't have the words to express—until now. Have you ever wondered about the lives of each person you pass on the street, realizing that everyone is the main character in their own story, each living a life as vivid and complex as your own? That feeling has a name: “sonder.” Or maybe you've watched a thunderstorm roll in and felt a primal hunger for disaster, hoping it would shake up your life. That's called “lachesism.” Or you were looking through old photos and felt a pang of nostalgia for a time you've never actually experienced. That's “anemoia.” If you've

never heard of these terms before, that's because they didn't exist until John Koenig set out to fill the gaps in our language of emotion. The Dictionary of Obscure Sorrows “creates beautiful new words that we need but do not yet have,” says John Green, bestselling author of *The Fault in Our Stars*. By turns poignant, relatable, and mind-bending, the definitions include whimsical etymologies drawn from languages around the world, interspersed with otherworldly collages and lyrical essays that explore forgotten corners of the human condition—from “astrophe,” the longing to explore beyond the planet Earth, to “zenosyne,” the sense that time keeps

getting faster. The Dictionary of Obscure Sorrows is for anyone who enjoys a shift in perspective, pondering the ineffable feelings that make up our lives. With a gorgeous package and beautiful illustrations throughout, this is the perfect gift for creatives, word nerds, and human beings everywhere.

Mirror Friend, Mirror Foe

Threshold Editions

After their fifteen-year-old daughter Maddie survives a successful transplant, Olivia is bound to her abusive husband now more than ever, while Maddie re-enters the real world only to find it more complicated.

Be the Refuge Penguin

Sofia comes from a family of storytellers. Here are her tales of growing up in the barrio, full of the magic and mystery of family traditions: making Easter cascarones,

celebrating el Dia de los Muertos, preparing for quincea—era, rejoicing in the Christmas nacimiento, and curing homesickness by eating the tequila worm. When Sofia is singled out to receive a scholarship to an elite boarding school, she longs to explore life beyond the barrio, even though it means leaving her family to navigate a strange world of rich, privileged kids. It's a different mundo, but one where Sofia's traditions take on new meaning and illuminate her path.
