Harley-Davidson Evolution Motorcycles

Harley-Davidson Motor Company Causey Enterprises, LLC

It's 1901 and a guy named Harley has an idea. Put an engine on a bicycle. What? Outside his door, carts are still pulled by horses and autos are a rare sight. It's 1908 and a Harley-Davidson motorcycle sets a record by getting 188 miles to a gallon of gas. It's 1909 and the company introduces something new to its line: a V-twin cylinder engine. Fast forward to the 21st century, and the technical innovation hasn't stopped. But there's a lot more than just choppers in the mix. Examples: The Harley-Davidson racing team adds a seventeen-year-old girl to the roster. 250,000 people help celebrate Harley's 100th anniversary in Milwaukee, Wisconsin. And a museum devoted to the company's products opens up. Clearly, this is a company unlike any other. How did Harley do it? How did it go from making motorcycles to creating a Harley experience that puts hundreds of thousands of people aged sixteen to one hundred on the road traveling to events each year where they can meet company officials and other Harley riders? That's what this book is all about.

In addition, the author offers special features that include a look at the colorful people associated with Harley, interesting trivia, a Harley-Davidson time line, a focus on products, a look at how the company treats its workers, what its detractors have to say, and where the company is headed. Honda may match Harley-Davidson for quality and perhaps innovation, but no one has matched the company for its ability to create 'buzz marketing' and turn casual riders into unofficial sales people. Harley-Davidson, it turns out, isn't just in the motorcycle business. As its mission statement points out, it's in the business of fulfilling dreams. This book documents how Harley-Davidson is a rare company in other ways: Its loyal workforce, for one thing, is guided by principles like trust and respect for the individual. For another, the company has made a superb effort to keep jobs in the United States, when it would be far cheaper and easier to use offshore labor. Teetering on the brink of bankruptcy in the early 1980s, Harley has roared back to capture the hearts of riders the world over, including the million-plus members of the Harley Owners Group (members are known, naturally, as HOGs). Harley-Davidson—a company that changed, and is changing, the world.

When anyone thinks of motorcycling, whether they are enthusiasts or only casually interested, the name Harley-Davidson immediately comes to mind. Harley-Davidson is among the oldest surviving motorcycle manufacturers; the company began in 1903 and continues to this day. As you can imagine, over the course of more than 100 years, the company has seen prosperous times as well as lean times, changes in focus and direction, evolution and revolution. All of that leads to a lot of company history and trivia. American Iron Magazine associate editor Tyler Greenblatt has compiled 1,001 Harley-Davidson facts into this single volume, with subjects ranging from the historic powertrains to pop culture to Harley-Davidson as a company and manufacturer. Facts begin with the early years, when a motorcycle was not much more than a bicycle with an engine attached, to the war efforts of World War I, when 15,000 were put into service. During the 1920s, Harley-Davidson grew into the largest manufacturer in the world, and that momentum helped carry it through the Great Depression and into World War II. Postwar development and AMF ownership are also covered in detail, as well as the restructuring and revival of the brand in recent years. Whether you're a casual rider, racer, or restorer, Harley-Davidson enthusiasts will be sure to find something in this book for that next conversation with fellow hobbyists. This book will keep Harley-Davidson enthusiasts entertained for hours, and is a great edition to any motorcycling library. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

From the editor-in-chief of Easyriders magazine, One Percenter presents an unprecedented social analysis of American outlaw biker culture. A longtime biker and self-proclaimed nonconformist, Dave Nichols is not a subtle man. "Bikers are the last wolves in a land of sheep," he affirms—but the motivations of today's biking culture stretch far back into the annals of human history. One Percenter: The Legend of the Outlaw Biker illuminates the origins of rebel mentality, which began far outside of cycling: with groups from the Mongols and Huns to the Vikings, from pirates to the gunslingers of the Old West. In his signature no-nonsense style, Nichols traces his own defiant mindset from ancient times all the way into the modern era, where this one-percenter perspective is best embodied by outlaw bikers. As biographical as it is insightful, One Percenter also touches on the iconic Harley-Davidson motorcycle, gives a brief history of Easyriders magazine, and unapologetically criticizes the U.S. media for what Nichols views as a biased, unfairly negative portrayal of motorcycle clubs. Complete with an exclusive collection of photographs taken by Kim Peterson, editor of In The Wind magazine, this book offers a fascinating and analytical discussion of the rebel ethos that has become a staple of American popular culture.

Donny Petersen has been educating motorcycle enthusiasts about Harley-Davidson bikes for years. Now, he has combined all his knowledge into a twelve-volume series masterpiece and this third book is one that every rider will treasure. Petersen, who has studied privately with Harley-Davidson engineers and has spent thirty-six years working on motorcycles, is sharing all of his secrets! As the founder of Toronto's Heavy Duty Cycles in 1974, North America's premier motorcycle shop, the dean of motorcycle technology teaches about the theory, design, and mechanical aspects of Harleys. In this third volume, discover: 1. How to identify the Evolution models. 2. Why the Evolution models are better. 3. Everything you need to know about engines. 4. Troubleshooting every facet of the Evolution. And so much more!

The Harley-Davidson Evolution The Japanese had more than quality. Their arsenal included acceleration and speed combining with good braking and handling. They could design, tool-up and build a new motorcycle in a mere eighteen months. The flavor of the day could easily be accomplished with this organizational skill and dexterity. On top of this they had lower prices. The Gang of 13 took over a failing company or did they? By 1982, Harley-Davidson sales went into a tailspin with plunging production. The USA was in a deep recession. Adding to the perfect storm was the flood of Asian imports that many believe were being sold in the U.S. below their manufactured costs. Whether this was true or not, how did a small country a half-world away manufacture a quality product that was faster, handled better, and was less expensive? Furthermore, these import motorcycles were more functional. Well, of course they did because USA motorcycle manufacturing offered old clunker styling that was slower, did not handle well, and broke down all the time! And for all of this, Harley-Davidson's cost more. Insulting if one thinks about it. It is not that the Evolution was that good relative to their competitors because in my opinion it was not. However, the Evolution was stellar relative to what went before. I was a loyal Shovelhead rider, necessarily becoming a mechanic along the way. I like the rest of my ilk would never consider riding any other product. I did not care that a Honda might be functionally better, less expensive, and not require my newfound mechanical skills. Honda simply did not give what my psyche craved. Importantly, H-D dropped its lackadaisical attitude towards copyright infringement, particularly with knock-off products. Harley-Davidson became extremely aggressive against the counterfeiting of their trademarks. It licensed use of its logos with all manner merchandise that was embraced by mainstream America followed by the world including the Japanese. H-D then saw the birth of HOG, the most successful marketing and loyalty campaign in the annals of corporate sustenance. The world embraced this pasteurized version of the outlaw subculture. You might meet the nicest people on a Honda but Harley riders are all about cool. They adapt a pseudo-outlaw lifestyle that emulates freedom and individualism. They spend much of their time adopting one charity or another to prove they really aren't bad. Many charities benefitted greatly during the Harley boom. Can these riders be contesting the Honda mantra of niceness? The previous owners AMF deserve much credit for the success of Harley-Davidson. They gave the Gang of 13 a platform from, which to launch. These new guys were brighter than bright. They put a management team together that knew no bounds in success. I am sure that Marketing 101 in every business school teaches and will continue to teach their brilliant story. Harley-Davidson became the epitome of American manufacturing and marketing,

the darling of capitalism at its finest. Think about it! How could a rusty old manufacturer whose time had drifted by reach such pinnacles of success? Well, H-D had a little help along the way with two main sociological factors: 1. The post World War II baby boom, the aging bulge in American demographics looking for adventure and whatever (safely) came their way. 2. A generation that worked hard; raised families and then looked back at what they had missed in their youth. Harley-Davidson embodied the freedom and adventure they lacked. Harley-Davidson was granted two decades, in which to plan a lasting and viable future. It sought to be the motorcycle of mainstream America. The world would follow. This venerable company almost pulled it off. The Motor Company updated technology both in their manufacturing venue and in the product itself. H-D balanced on a near-impossible fulcrum, maintaining tradition on one side and complying with environmental dictates on the other. The Evolution's successor, the air-cooled Twin Cam introduced in 1999 with great success. H-D continued to grow and prosper. I have always viewed the Twin Cam as a transitional model embracing the past but leading into a future of overhead cams and water jackets. The new H-D V-Rod's technological marvels are a wonderful attempt but as much as the Factory hoped, mainstream Harley riders did not take the bait en masse. After all they had their psychological needs. These attempts did not prevent dark clouds from appearing on the horizon: 1. Inexorably, the post World War II baby boom's bulge has grown older, losing interest in reclaiming youth with interests shifting elsewhere. Who is to take over this downsizing market? Who will be left to support the Motor Company in the style it has become accustomed? 2. In my humble opinion, the masters of marketing did not fill the coming void of consumers. I think H-D is good at pretty much everything except lowering prices for the incoming generations. Nor have they developed affordable and desirable product lines for the youth. Certainly, the Factory began to enjoy economies of scale in manufacturing. I for one do not think they have used their profits wisely for continued prosperity. Will I continue to ride a Harley at age 62? Sure I will but I was riding them before they became cool. I am not a dentist looking for a safe walk on the wild side or a movie star acquiring the in-bauble of the day. The Evolution motorcycle saved the Hog's bacon but a new savior is now required.
