"From Karaoke to the Platters" is the inspirational tale of how Paul B Allen III went from singing in karaoke establishments, to become the lead singer of one of the greatest vocal groups of all time, The Platters (Only You; Smoke Gets In Your Eyes; The Great Pretender, etc.). Paul was not allowed entry into his elementary school chorus because of his "tin ear," so the trip from "reject" to lead vocalist was an incredible journey. Paul shares that journey, as well as all the things he did, step by step, that led him to performing at venues like the world-famous Kennedy Center, backed by the National Symphony Orchestra, and his singing for the rich and famous all around the world, including performing for the Royal Family in London, Prince Albert in Monaco, and being invited to the White House to perform for the President of the United States of America. This book is made

up of two parts that are linked together by Paul's real-life experiences in the music industry, as an internationally published songwriter and as the lead vocalist of The Platters. Part One tells step by step how he did it (and how you can too), and Part Two tells what happened once he "arrived." It is a truly fascinating account that can only be told by someone who has lived the life. And as you read, you'll feel like you're living it right alongside of him.

This book is a most exciting and unusual study of cultural history. The idea of the pregnant man, redolent of bawdy jokes and sexual fantasy, has inspired European literature and folklore since ancient times. Traces of the theme, both comical and disturbing, are found not only in the wealth of tales from Italy, France, Germany, Russia, Finland and other European Countries, but also in the Hebrew and Islamic traditions.

This book studies the industrial development of Japan since the mid-nineteenth century, with particular emphasis on how the various industries built technological capabilities. The Japanese were extraordinarily creative in searching out and learning to use modern technologies, and the authors investigate the emergence of entrepreneurs who began new and risky businesses, how the business organizations evolved to cope with changing technological conditions, and how the managers, engineers, and workers acquired organizational and technological skills through technology importation, learning-by-doing, and their own R & D activities. The book investigates the interaction between private entrepreneurial activities and public policy, through a general examination of economic and industrial development, a study of the evolution of management systems, and six industrial case studies: textile, iron and steel, electrical and communications equipment, automobiles, shipbuilding and aircraft, and pharmaceuticals. The authors show how the Japanese government has played an important supportive role in the continuing innovation, without being a substitute for aggressive business enterprise constantly venturing into unfamiliar terrains.

Independent checkpointing allows maximum process autonomy but suffers from potential domino effects. Coordinated checkpointing eliminates the domino effect by sacrificing a certain degree of process autonomy. In this paper, we propose the technique of lazy checkpoint coordination which preserves process autonomy while employing communication-induced checkpoint coordination for bounding rollback propagation. The introduction of the notion of laziness allows a flexible trade-off between the cost for checkpoint coordination and the average rollback distance. Worst-case overhead analysis provides a means for estimating the extra checkpoint overhead. Communication trace-driven simulation for several parallel programs is used to evaluate the benefits of the proposed scheme for real applications. Wang, Yi-Min and Fuchs, W. introduction to the Social Change Model of Leadership Development (SCM), giving students a real-world context through which to explore the seven C's of leadership for social change as well as approaches to socially responsible leadership. From individual, group, and community values through the mechanisms of societal change itself, this book provides fundamental coverage of this increasingly vital topic. Action items, reflection, and discussion questions throughout encourage students to think about how these concepts apply in their own lives. The Facilitator's Guide includes a wealth of activities, assignments, discussions, and supplementary resources to enrich the learning experience whether in class or in the co-curriculum. This new second edition includes student self-assessment rubrics for each element of the model and new discussion on the critical roles of leadership self-efficacy, social perspective, and social justice perspectives. Content is enriched with research on how this approach to leadership is developed, and two new chapters situate the model in a broader understanding of leadership and in applications of the model. The Social Change Model is the most widely-used leadership model for college students, and has shaped college leadership curricula at schools throughout the U.S. and other countries including a translation in Chinese and Japanese. This book provides a comprehensive exploration of the model, with a practical, relevant approach to real-world issues. Explore the many facets of social change and leadership Navigate group dynamics surrounding controversy, collaboration, and purpose Discover the meaning of citizenship and your commitment to the greater good Become an agent of change through one of the many routes to a common goal The SCM is backed by 15 years of research, and continues to be informed by ongoing investigation into the interventions and environments that create positive leadership development outcomes. Leadership for a Better World provides a thorough, well-rounded tour of the Social Change Model, with guidance on application to real-world issues. Please note that The Social Change Model: Facilitating Leadership Development (978-1-119-24243-7) is intended to be used as a Facilitator's Guide to Leadership for a Better World, 2nd Edition in seminars, workshops, and college classrooms.
