the Rougon-Macquart series by Émile Zola. The novel is set in the world of the department store, an innovative development in mid-nineteenth century retail sales. Zola models his store after Le Bon Marché, which consolidated under one roof many of the goods hitherto sold in separate shops. In *Au Bonheur des Dames*, the store is a symbol of capitalism, the modern city and the bourgeois family. It is emblematic of changes in consumer culture, sexual attitudes and class relations taking place at the end of the century. The novel tells the story of Denise Baudu, a 20-year-old woman from Valognes who comes to Paris with her brothers and begins working at the department store *Au Bonheur des Dames* as a saleswoman. Zola describes the inner workings of the store from the employees' perspective, including the 13-hour workdays, the substandard food and the bare lodgings (for the female staff).

Many of the conflicts in the novel spring from the struggles for advancement and the malicious infighting and gossip among the staff. *Au Bonheur des Dames* is a sequel to "Pot-Bouille". Like its predecessor, *Au Bonheur des Dames* focuses on Octave Mouret (b. 1840), who at the end of the previous novel married Caroline Hédouin, the owner of a small silk shop. Now a widower, Octave has expanded the business into an international retail powerhouse.

The New Old World looks at the history of the European Union, the core continental countries within it, and the issue of its further expansion into Asia. It opens with a consideration of the origins and outcomes of European integration since the Second World War, and how today 's EU has been theorized across a range of contemporary disciplines. It

then moves to more detailed accounts of political and cultural developments in the three principal states of the original Common Market—France, Germany and Italy. A third section explores the interrelated histories of Cyprus and Turkey that pose a leading geopolitical challenge to the Community. The book ends by tracing ideas of European unity from the Enlightenment to the present, and their bearing on the future of the Union. The New Old World offers a

---

critical portrait of a continent now increasingly hailed as a moral and political example to the world at large.

Science on Stage in

Early Modern Spain features essays by leading scholars in the fields of literary studies and the history of science, exploring the relationship between technical innovations and theatrical events that incorporated scientific content into dramatic productions. Focusing on Spanish dramas between 1500 and 1700, through the birth and development of its playhouses and coliseums and the

phenomenal success of its major writers, this collection addresses a unique phenomenon through the most popular, versatile, and generous medium of the time. The contributors tackle subjects and disciplines as diverse as alchemy, optics, astronomy, acoustics, geometry, mechanics, and mathematics to reveal how theatre could be used to deploy scientific knowledge. While Science on Stage

---

contributes to cultural and performance studies it also engages with issues of censorship, the effect of the Spanish Inquisition on the circulation of ideas, and the influence of the Eastern traditions in Spain.

"Plot", writes Peter Brooks, "is so basic to our very experience of reading, and indeed to our articulation of experience in general, that criticism has often passed it over in silence..." (Reading for the Plot, xi). Finding the Plot both explores and helps to redress this critical neglect. The book brings together an international group of scholars to address the nature, effects and specific pleasures of consuming stories. If the central focus is on France

and popular literary fiction, the book's scope – like contemporary fiction itself – observes no national frontiers, and extends across a variety of media. The book addresses both the empirical question of which genres and types of text have been and are most "popular", and the theoretical questions of how plots work, what pleasures they offer to readers, and why it matters that the plot should not be lost.

The explosive debate that transformed our views about

---

time and scientific truth On April 6, 1922, in Paris, Albert Einstein and Henri Bergson publicly debated the nature of time. Einstein considered Bergson's theory of time to be a soft, psychological notion, irreconcilable with the quantitative realities of physics. Bergson, who gained fame as a philosopher by arguing that time should not be understood exclusively through the lens of science, criticized Einstein's theory of time for being a metaphysics grafted on to science, one that ignored the intuitive aspects of time. *The Physicist and the Philosopher* tells the remarkable story of how this explosive debate of time and drove a rift between science and the humanities that persists today. Jimena Canales introduces readers to the revolutionary ideas of Einstein and Bergson, describes how they dramatically collided in Paris, and traces how this clash of worldviews reverberated across the twentieth century. She shows how it provoked responses from figures such as Bertrand Russell and Martin Heidegger, and carried repercussions for American pragmatism, logical positivism, phenomenology, and quantum mechanics. Canales explains how the new technologies of the period—such as wristwatches, radio, and film—helped to shape people's conceptions of time and further polarized the public debate. She also discusses how Bergson and Einstein, toward the end of their lives, each reflected on his rival's legacy—Bergson during the Nazi occupation of Paris and Einstein in the context of the first hydrogen bomb explosion. *The Physicist and the Philosopher* is a magisterial and revealing account that shows how scientific truth was placed on trial in a divided century marked by a new sense of time.

In December 1921, France broadcast its first public radio program from a transmitter on the Eiffel Tower. In the decade that followed, radio evolved into a mass media capable of reaching millions. Crowds flocked to loudspeakers on city streets to listen to propaganda, children clustered around classroom radios, and families tuned in from their living rooms.

Radio and the Politics of Sound in Interwar France, 1921–1939 examines the impact of this auditory

culture on French society and politics, revealing how broadcasting became a new platform for political engagement, transforming the act of listening into an important, if highly contested, practice of citizenship. Rejecting models of broadcasting as the weapon of totalitarian regimes or a tool for forging democracy from above, the book offers a more nuanced picture of the politics of radio by uncovering competing interpretations of listening and diverse uses of broadcast sound that

flourished between the world wars.

Drawing largely on the etymological meaning of the word 'confusion' as the action of mixing or blending, John C. O'Neal traces the development of a progressive poetics of confusion in the French Enlightenment. This project, he claims, aimed to reject dogmatic thinking in all of its forms and to recognize the need to

---

embrace complexity. Eighteenth-century thinkers used the notion of confusion in a progressive way to reorganize social classes, literary forms, metaphysical substances, scientific methods, and cultural categories such as taste and gender.

*Eunuchs and Castrati* examines the enduring fascination among historians, literary critics, musicologists, and other scholars around the figure of the castrate.

Specifically, the book asks what influence such fascination had on the development and delineation of modern

ideas around sexuality and physical impairment.

Ranging from Greco-Roman times to the twenty-first century, Katherine Crawford brings together travel accounts, diplomatic records, and fictional sources, as well as existing scholarship, to demonstrate how early modern interlocutors reacted to and depicted castrates. She reveals how medicine and law operated to maintain the privileges of bodily integrity and created and

extended prejudice against those without it. In

consequence, castrates were constructed as gender deviant, disabled social subjects and demarcated as inferior.

Early modern cultural loci then reinforced these perceptions, encouraging an othering of castrates in public contexts. These extensive, almost obsessive accounts of appearance, social propensities, and gender characteristics of castrated men reveal the historical

---

lineages of sexual stigma and hostility towards gender non-normative and physically impaired persons. For Crawford, they are the roots of sexual and physical prejudices that remain embedded in the western experience today.

The traditionally American genre of the road movie has been explored and reconfigured in the French context since the later 1960s. Comparative in its

approach, this book studies the inter-relationship between American and French culture and cinemas, and in the process considers and challenges histories of the road movie. It combines film history with film theory methodologies, analysing transformations in social, political and film-industrial contexts alongside changing perspectives on the meaning and possibilities of film. At once chronological and thematic in structure, The French Road Movie provides in each chapter a comprehensive introduction

---

to key themes emerging from the genre in the French context – liberty, identity and citizenship, masculinity, femininity, border-crossing – followed by detailed, innovative and often revisionist readings of the chosen films. Through these readings the author justifies the place of the road genre within French cinema histories and reinvigorates this often neglected and misunderstood area of study.

In 1409 Laurent de Premierfait produced a French translation of Boccaccio's *De casibus virorum illustrium*. Richly illustrated copies of the translation, known as *Des*

*cas des nobles hommes et femmes*, became enormously popular, allowing for a consideration not only of how Boccaccio's Latin made its way into Laurent's French but also how the text was converted into visual images. In *Translating the Past*, art historian Anne D. Hedeman traces the history of Laurent's work from the first copies made for the dukes of Berry and Burgundy, to manuscripts independently produced

The kingdom of France, a byword for upheaval and instability for a century before 1660, was transformed over

the subsequent generation into the greatest power in Europe and an institutional model admired and imitated almost everywhere. A further century elapsed before this hegemony was challenged, and even then the collapse of monarchy in 1788 took most people by surprise. This book, bringing together an authoritative international panel of historians, portrays and analyses the life of France between two revolutions, a time later known as the old regime. All aspects of French life are covered: the economy, social development, religion and culture, French activity overseas, and not least politics

and public life, where our understanding has been completely renewed over recent years. A detailed chronology and full bibliography complete this compelling analysis of an age behind whose calm and assured facade forces were developing which were to shape a very different country and continent.

The Sounds of Early

Cinema is devoted

exclusively to a little-

known, yet absolutely

crucial phenomenon: the

ubiquitous presence of

sound in early cinema.

---

"Silent cinema" may rarely have been silent, but the sheer diversity of sound(s) and sound/image relations characterizing the first 20 years of moving picture exhibition can still astonish us. Whether instrumental, vocal, or mechanical, sound ranged from the improvised to the pre-arranged (as in scripts, scores, and cue sheets). The practice of mixing sounds with images differed widely, depending on the venue (the nickelodeon in Chicago versus the summer Chautauqua in rural Iowa, the music hall in London or Paris versus the newest palace cinema in New York City) as well as on the historical moment (a single venue might change radically, and many times, from 1906 to 1910).
