This is a classic regional and comparative study of early modern witchcraft. The history of witchcraft continues to attract attention with its emotive and contentious debates. The methodology and conclusions of this book have impacted not only on witchcraft studies but the entire approach to social and cultural history with its quantitative and anthropological approach. The book provides an important case study on Essex as well as drawing comparisons with other regions of early modern

England. The second edition of this classic work adds a new historiographical introduction, placing the book in context today.

History of Protestant Theology, Particularly in Germany Oxford University Press, USA

In this study, Professor Trevor-Roper reveals the social and intellectual background to the witch-craze of the 16th and 17th centuries. Orthodoxy and heresy had become deeply entrenched notions in religion and ethics as an evangelical church exaggerated the heretical theology and loose morality of its opponents. Gradually, non-conformists as well as whole societies began to be seen in terms of stereotypes and witches became the scapegoats for all the ills of society. Court Minutes of New

Mendoza the Jew combines a graphic history with primary documentation and contextual information to

explore issues of nationalism, identity, culture, and historical methodology through the life story of Daniel Mendoza. Mendoza was a poor Sephardic Jew from East London who became the boxing champion of Britain in 1789. As a Jew with limited means and a foreign-sounding name, Mendoza was an unlikely symbol of what many Britons considered to be their very own "national" sport.
