*The Hidden History of the Human Race* New York, Charles Scribner's sons

In this study, Professor Trevor-Roper reveals the social and intellectual background to the witch-craze of the 16th and 17th centuries. Orthodoxy and heresy had become deeply entrenched notions in religion and ethics as an evangelical church exaggerated the heretical theology and loose morality of its opponents. Gradually, non-conformists as well as whole societies began to be seen in terms of stereotypes and witches became the scapegoats for all the ills of society.

Shattering the Myths of Darwinism

Over the centuries, researchers have found bones and artefacts proving that modern humans have existed for millions of years. Mainstream science, however has suppressed these facts. Prejudices based on current scientific theory act as a 'knowledge filter', giving us a picture of prehistory that is largely inaccurate. This book reveals this hidden history.

News from New-England, 1676

Compelling evidence that the most important assumptions on which Darwinism rests are scientifically wrong. The controversial best-seller that sent Oxford University and Nature magazine into a frenzy. Shattering the Myths of Darwinism exposes the gaping holes in an ideology that has reigned unchallenged over the scientific world for a century. Darwinism is considered to be hard fact, the only acceptable explanation for the formation of life on Earth, but with keen insight and objectivity Richard Milton reveals that the theory totters atop a shambles of outdated and circumstantial evidence which in any less controversial field would have been questioned long ago. Sticking to the facts at hand and tackling a vast array of topics, Shattering the Myths of Darwinism offers compelling evidence that the theory of evolution has become an act of faith rather than a functioning science, and that not until the scientific method is applied to it and the right questions are asked will we ever get true answers to the mystery of life on Earth.
