In questo lavoro “Progettare Paesaggio, Landscape as Infrastructure” si confrontano: da un lato le stimolanti proposte progettuali redatte dal gruppo di studenti della Harvard Graduate School of Design guidati dalla docente Paola Cannavò; dall’altro l’analisi del territorio portuense ed ostiense e delle possibili future trasformazioni del contesto paesaggistico determinate dai progetti infrastrutturali, in fase di realizzazione o di valutazione, con ipotesi di linee guida per la riqualificazione e la valorizzazione di questa area, intesa come complesso palinsesto storico e paesaggistico, al fine di rendere evidenti le modalità procedurali di quella reale tutela attiva e dinamica del paesaggio affidata al Ministero per i beni e le attività culturali e da sempre svolta. [ANTONIA P. RECCHIA – Direttore Generale, Direzione Generale per il paesaggio, le belle arti,

l’architettura e l’arte contemporanee, MiBAC] The project “Progettare Paesaggio, Landscape as Architecture” combines the inspiring design proposals drafted by a group of students of the Harvard Graduate School of Design headed by the teacher Paola Cannavò with a study of the portuense and ostiense areas and how the landscape might change due to the construction of new infrastructure, either being completed or in the design stage. The study includes guidelines for the requalification and enhancement of the area considered as a complex historical landscape; it also highlights the past and present active and dynamic protection measures and procedures adopted by the Italian Ministry of Cultural Heritage and Activities. [ANTONIA P. RECCHIA – Director General, Directorate General for the landscape, fine arts, architecture and contemporary art, MiBAC] “Questa pubblicazione e la ricerca progettuale qui documentata, propongono una opportuna testimonianza delle sfide contemporanee della forma urbana, del processo ecologico e dello sviluppo economico affrontato dalla capitale italiana.” “Evidenziando gli impulsi complessi e contraddittori di tipo ecologico ed economico di un paesaggio portuale attivo, Cannavò propone un nuovo ruolo chiave per l’architettura del paesaggio come strumento urbanistico. Così facendo promuove una posizione italiana all’interno del dibattito contemporaneo sul Landscape Urbanism e l’Ecological Urbanism fornendo al contempo una prospettiva futura per l’urbanistica, anche nell’area di Fiumicino.” [CHARLES WALDHEIM – Direttore, Dipartimento di Architettura del Paesaggio, Harvard Graduate School of Design] “This publication, and the design research that it documents, offers timely evidence of the contemporary challenges of urban form, ecological process, and economic development faced by the Italian capital.” “Highlighting the complex and contradictory ecological and economic impulses of a working port landscape, Cannavò proposes a renewed relevance for landscape architecture as a medium of urbanism. In so doing, she stakes an Italian position in the contemporary discourses of landscape urbanism and ecological urbanism, while pointing to a way forward for urbanism, even in the fields of Fiumicino.” [CHARLES WALDHEIM – Chair, Department of Landscape Architecture, Harvard Graduate School of Design] Accounts and Papers of the House of Commons Bloomsbury Publishing

In this book, legal scholars from the EU Member States (with the addition of the UK) analyse the development of the EU Member States’ attitudes to economic, fiscal, and monetary integration since the Treaty of Maastricht. The Eurozone crisis corroborated the warnings of economists that weak economic policy coordination and loose fiscal oversight would be insufficient to stabilise the monetary union. The country studies in this book investigate

the legal, and in particular the constitutional, pre-conditions for deeper fiscal and monetary integration that influenced the past and might impact on the future positions in the (now) 27 EU Member States. The individual country studies address the following issues: - Main characteristics of the national constitutional system, and constitutional culture; - Constitutional foundations of Economic and Monetary Union (EMU) membership and related instruments; - Constitutional obstacles to EMU integration; - Constitutional rules and/or practice on implementing EMU-related law; and - The resulting relationship between EMU-related law and national law. Offering a comprehensive and detailed assessment of the legal and constitutional developments concerning the Economic and Monetary Union since the Treaty of Maastricht, this book provides not only a study of legal EMU-related measures and reforms at the EU level, but most importantly sheds light on their perception in the EU Member States.

The book reflects on the issues concerning, on the one hand, the difficulty in feeding an ever-increasing world population and, on the other hand, the need to build new productive systems able to protect the planet from overexploitation. The concept of "food diversity" is a synthesis of diversities: biodiversity of ecological sources of food supply; socio-territorial diversity; and cultural diversity of food traditions. In keeping with this transdisciplinary perspective, the book collects a large number of contributions that examine, firstly the relationships between agrobiodiversity, rural sustainable systems and food diversity; and secondly, the issues concerning typicality (food specialties/food identities), rural development and territorial communities. Lastly, it explores legal questions concerning the regulations aiming to protect both the food diversity and the right to food, in the light of the political, economic and social implications related to the problem of feeding the world population, while at the same time respecting local communities' rights, especially in the developing countries. The book collects the works of legal scholars, agroecologists, historians and sociologists from around the globe.

La funzione dirigenziale oltre il pubblico e il privato Springer

This book presents the results of extensive international comparative research into the effects of the economic and financial crisis on democratic institutions and social cohesion policies. The collected studies describe and analyse the measures (often referred to as "reforms") adopted to counter the

crisis and the effects of these measures. It investigates three areas: the impact on the functioning of institutions, with respect to the relationship between representative institutions and governments, and the organisational structure of administrations at national and local levels; the impact that the austerity policies on public spending have on social rights; and the impact on traditional instruments of public action (administrative simplification, public services delivering, the use of common assets). The general findings highlight the effect of reducing the administrative and government capacity of the democratic institutions: the public sector, rather than being innovative and made more effective, declines, offering increasingly poor public services and making bad decisions, fuelling substantive or formal privatisation solutions, which in turn cause further weakening.

This book explores the complex domain of social reality, asking what this reality is, how it is composed and what its dynamics are in both theoretical and practical terms. Through the examination of some of the most important contemporary theories of social ontology, the book discusses the fundamentals of the discipline and lays the foundations for its development in the political sphere. By analyzing the notion of State and the redesign of ontology, the author argues in favor of a realist conception of the State and shows the reasons why this promotes a better understanding of the dynamics of power and the actualization of a greater justice between generations. This book captures the relationship between different generations within the same political context, and presents it as a necessary condition for the re-definition of the concepts of State and meta-State.

Legal Perspectives for a Scientific, Cultural and Social Debate on the Right to Food and Agroecology Bloomsbury Publishing

In this important contribution to political theory, Massimo Modonesi develops the thesis that a Marxist theory of political action can be developed from the notion of antagonism, defined as a distinctive feature of struggle and of the political experience of insubordination.

The Antagonistic Principle Lulu.com

This book is a sociological description and analysis of urban collective actions, protests, resistance, and riots that started in the 1990s and continue in different forms to this date in Rome, Italy. Through participant observation, ethnographic study, and in-depth qualitative interviews—often occurring during times of protest or even violent action—this book studies a variety of urban realities: grassroots movements, anti-migrant district riots, and the daily lives of the fluid and fluctuating multi-ethnic groups in the city. Ultimately, this book gives voice to some of the protagonists involved, proposing interpretations to each reality described, but also making cross-connections with politics and migration when pertinent. It offers a new understanding of urban collective actions cognizant of the 'common goods', but also of the emergence of new right-wing populism.

Beyond Poverty and Empire Routledge

The issue of debt and how it affects our lives is becoming more and more urgent. The "Austerity" model has been the prevalent European economic policies of recent years led by the "German model". Elettra Stimilli draws upon contemporary philosophy, psychology and theology to argue that austerity is built on the idea that we somehow deserve to be punished and need to experience guilt in order to take full account of our economic sins. Following thinkers such as Max Weber, Walter Benjamin and Michel Foucault, Debt and Guilt provides a startling examination of the relationship between contemporary politics and economics and how we structure our inner lives. The first English translation of Debito e Colpa, this book provokes new ways of thinking about how we experience both debt and guilt in contemporary society.

The book is an intellectual analysis of the political ideas of English radical thinker Thomas Spence (1750 – 1814), who was renowned for his "Plan", a proposal for the abolition of private landownership and the replacement of state institutions with a decentralized parochial organization. This system would be realized by means of the revolution of the "swinish multitude", the poor labouring class despised by Edmund Burke and adopted by Spence as his privileged political interlocutor. While he has long been considered an eccentric and anachronistic figure, the book sets out to demonstrate that Spence was a deeply original, thoroughly modern thinker, who translated his themes into a popular language addressing the multitude and publicized his Plan through chapbooks, tokens, and songs. The book is therefore a history of Spence's political thought "from below", designed to decode the subtle complexity of his Plan. It also shows that the Plan featured an excoriating critique of colonialism and slavery as well as a project of global emancipation. By virtue of its transnational scope, the Plan made landfall in the British West Indies a few years after Spence's death. Indeed, Spencean ideas were intellectually implicated in the largest slave revolt in the history of Barbados.

This book examines the normative principles that guide the governance of education, in particular the notion of education as a public good. Determining whether this concept is still valid is a topic of growing importance, especially considering the phenomena of increasing privatisation and marketisation in the sector. The author posits that the prioritisation of economic aspects of education may lead to the weakening of the role of the State in ensuring equality of opportunity and social justice, and thus to a significant risk of considering education as merely a private, marketable good. The volume argues that considering education as a common good can lead to the strengthening of democratic and participatory approaches to educational governance, based on the recognition of education as a shared endeavour and responsibility. It will be of interest and value to students and scholars of education as a public good, social justice, and the wider neoliberalisation of the education sector.

Parliamentary Papers Oltre il pubblico e il privato per un diritto dei beni comuni

This book is dedicated to the consolidation and to the expansion of theoretic systems thinking as a necessary integration of the general reductionist and analytical attitude dominant in our culture. Reductionism and analytical approaches have produced significant results in many fields of contemporary knowledge giving a great contribution to relevant scientific discoveries and to their technological application, but their validity has been improperly universalized as the only and best methods of knowledge in every domain. It is nowadays clear that analytical or mereological approaches are inadequate to solve many problems and that we should introduce – or support the diffusion of - new concepts and different research attitudes. A good candidate to support such a shift is the well known theoretical approach based on the concept of “ system ” that no more considers the elementary constituents of an object, but the entity emerging from the relations and interactions among its elementary parts. It becomes possible to reconstruct several domains, both philosophical and scientific, from the systemic point of view, introducing fresh ideas in the research in view of a general rational vision of the world on more comprehensive basis. This book contributes to the diffusion and evolution of systemic thinking by focusing on two main objectives: developing and updating the systemic approach in disciplines currently using it and introducing the systemic perspective in humanistic disciplines, where the approach is not widely used. The Systemic Turn in Human and Natural Sciences: A Rock in the Pond is comprised of ten chapters. The chapter authors adopt a trans-disciplinary perspective, consisting in the recognition and harmonization of the special outlooks that together, within the general systemic paradigm, gives an ideal unity to the book.

The recent austerity measures currently adopted in numerous European countries assume that a rise in public debt should automatically result in cuts to social programmes and the privatisation of “ inefficiently ” managed resources. This type of reasoning is being used to justify the destruction of social rights of citizens for the profit of the private sector, resulting in more limited access to the most fundamental resources such as water, nature, housing, culture, knowledge and information, mainly for the most vulnerable members of society. Such a view, informed solely by short-term growth and profit cycles, is endangering access to those resources not only for current generations but for future ones as well. This book is an attempt to go beyond liberal approaches to intergenerational and distributive justice. It emphasises the role of commons and communities of the commons, driven by the desire to defend and perpetuate those fundamental resources under the threat of expropriation by the state and the market. This book also offers policy makers and citizens, who wish to accept their political responsibility by being active and refusing corporate ideology, some best practices as well as methods and solutions for renewing the configurations of societal relationships through commons, thereby integrating the interests of future generations in the European Community 's decision-making processes and institutions. This is a contribution by the Council of Europe and the International University College of Turin to the protection of the dignity of every person, especially of those who, even though unable to enjoy existing social rights, have the right to benefit from choices and policies that ensure that human life remains unspoiled

This book highlights the cogency and urgency of the protection of indigenous peoples and discusses crucial aspects of the international legal theory and practice relating to their rights. These rights are not established by states; rather, they are inherent to indigenous peoples because of their human dignity, historical continuity, cultural distinctiveness, and connection to the lands where they have lived from time immemorial. In the past decades, a new awareness of the importance of indigenous rights has emerged at the international level. UN organs have adopted specific international law instruments that protect indigenous peoples. Nonetheless, concerns persist because of continued widespread breaches of such rights. Stemming from a number of seminars organised at the Law Department of the University of Roma Tre, the volume includes contributions by distinguished scholars and practitioners. It is divided into three parts. Part I introduces the main themes and challenges to be addressed, considering the debate on self-determination of indigenous peoples and the theoretical origins of ‘ indigenous sovereignty ’. Parts II and III explore the protection of indigenous peoples afforded under the international law rules on human rights and investments respectively. Not only do the contributors to this book critically assess the current international legal framework, but they also suggest ways and methods to utilize such legal instruments towards the protection, promotion and fulfilment of indigenous peoples ' rights, to contribute to the maintenance of peace and the pursuit of justice in international relations.
