Based on ethnographic research,
this book examines the paranormal
investigation subculture in the US.
Presenting interviews with

investigators as well as extensive field study of ghosts as an inherently social phenomenon, it explores their reasons for getting involved, their use of different investigative methods, the interpretive processes by which they individually and collectively 'sense' spirits, the ways in which these processes are influenced by small group power dynamics, and what paranormal investigation ultimately means to those who participate. While focusing on the practices by which investigators 'sense' spirits in small groups, the author also situates paranormal investigation within a broader cultural context and attends to how investigators attempt to legitimize their practice despite being marginalized by both science and religion. A fascinating

study of ghosts as an inherently social phenomenon, Sensing Spirits will appeal to sociologists with interests in ethnography, interactionism, cultural studies and subcultures.

Fratricide has been defined as firing on your own forces, when mistaking them for enemy forces, which results in injury or death. Rates of fratricide incidence have been steadily increasing and the complexity of the contemporary operating environment may lead to a continuation of this trend. Although the

majority of research into fratricide has focused on the development of technological decision aids, recent explorations highlight the need to emphasise the social aspects within a socio-technical framework. This book presents and validates, via the use of case studies, a model of teamwork and decision-making factors that are associated with incidents of fratricide. In summary, it offers a review and evaluation of

contemporary theoretical perspectives on teamwork and fratricide, as well as a range of accident analysis approaches. A novel theory of fratricide is then presented followed by a new methodology for assessing fratricide. Naturalistic case studies of teams are undertaken in the military domain. These studies illustrate the approach and offer early validation evidence. In closing, the book presents a series of principles designed to reduce the

likelihood of fratricide in the future.

Organizational leaders often struggle to establish and sustain a trusting culture in times of constant changes in the corporate fabric and unethical behavior by corporate leadership. Organizational justice theory provides a means to explain and better understand employees' perceptions of trust, fairness, and the management of change during strategic change. Qualitative

studies have yet to be conducted on how an organizational justice framework would address the need of organizational justice for novel, conceptually derived accounts of non-managerial employee perspectives. The purpose of Organizational Justice during Strategic Change is to be both an academic and practical book. After presenting the theoretical elements of the topic, half the book is devoted to a detailed case study of employee interviews conducted in a large, privately-owned media organization addressing the issues of the book topic. The

authors' research findings from the case study indicated employees who experience trust and positive feelings regarding their treatment within the organization are willing to become involved in the change process and adopt positive working relationships with their colleagues and managers. This study is important for organizational management to gain knowledge and understanding on how employees' perceptions of distrust and unfairness can lead to resistance and negative behaviors toward organizations and management during

strategic change.

This volume reports on
bilingual practices in
contemporary societies
in a number of European
and non-European
countries. The topics
discussed here include
language use and
language learning in a
bilingual context, issues
in bilingual education, the
use of language in the

linguistic landscape,
language and the media,
language perceptions,
language use and
attitudes, and the use of
language as a vantage
point for the study of
social change. This book
captures the various
different approaches and
viewpoints on bilingualism
by researchers who have
focused on contexts such
as Cyprus, the Czech
Republic, Estonia, France,
Israel, Italy, Japan, Malta,
the Netherlands, Romania,
Sweden and the USA. Of
the 17 chapters here, five

deal with aspects of
bilingualism in Malta,
which, in view of its
minuscule size but
complex language use,
offers itself as an
excellent laboratory for
the scientific study of
bilingualism.

The aim of this Research Topic was to offer an interdisciplinary forum for researchers interested in the interplay of face, eye gaze, and body perception in the understanding of others, with an emphasis on behavioural and neural processing. The papers included in this topic

come from cognitive, neuroscience and social psychology perspectives and shed new light on how facial and body cues interact with each other and with social, ecological and contextual factors (such as for example social identification and group membership) to form a unified representation that can guide our perceptions and responses to other people. Altogether, they provide an up-to-date picture of advances in this fascinating research field.

This is the only book linked to a practical surveying course. Highly practical in nature, and packed with detailed close-up photography, step by step procedures, and helpful checklists, this definitive handbook will prove a godsend to small craft owners who want to check out defects on their own boats or on boats they

are planning to buy, as well as practicing surveyors and surveying students. Featuring surveying bodies, equipment required, assessing defects (including moisture-related defects, and the use of moisture meters) and their severity, the book guides the reader through conducting a thorough inspection, from keel to topsides, coachroof, stern gear, rigging and much more.

The highly practical approach of this book will be invaluable to students of surveying, qualified surveyors and yacht and boat owners everywhere.

As citizens, we must all take responsibility for our

own health to some extent, and recent developments in medical informatics have provided some valuable new ways to help us do that. This book presents the proceedings of the 2020 Special Topic Conference of the European Federation for Medical Informatics (EFMI STC 2020), held for the first time as a virtual conference on 26 & 27 November 2020, due to restrictions associated with the COVID-19 pandemic. Entitled Integrated citizen centered digital health and social care – Citizens as data producers and service co-creators, this conference

focused on the citizen-centered aspects of health informatics. This topic provided the opportunity for contributors to present innovative solutions to allow citizens to take greater responsibility for their health with the help of information and communication technology, and the 52 presented papers published here cover a wide range of areas under the broad, invited subject headings of: tools and technologies to support citizen-centered digital services; capacity building to enhance the development and use of digital services;

confidentiality, data integrity and data protection to guarantee trustworthy services; citizen safety in digital services; effectiveness and impact of citizen-digital and integrated health and social services; evaluation approaches and methods for digital services; usability, usefulness and user acceptance of digital services; and guidelines for the successful implementation of digital services for citizens. Offering a current overview of research and applications, the book will be of interest to all those

health professionals working to increase citizen use of digital healthcare. *Surveying Yachts and Small Craft* Academic Press As the official publication for Windows Vista, we cover Microsoft 's latest OS with more depth, passion and clarity than any other magazine on the market. This ethnographic study deals with the ways people in Athens, Greece, use style to construct their social class identities. Including a rich dataset comprising ethnographic interviews with actual people who live in the stereotypically seen as leafy and posh northern suburbs and in the stereotypically treated as working class western suburbs of Athens coupled with data from popular literary novels, TV series

and Greek hip hop music, it argues that the relationship between style and social class identity is mediated by complex social meanings encompassing features from and discourses relevant to both areas, which are structured across different orders of indexicality depending on the genre of speech in which they are created. As such, it will be of interest to scholars in sociolinguistics, discourse analysis, anthropology, sociology, Modern Greek studies, and to everyone who is interested in how social class is constructed via language.

This book offers a critical reflection on interpersonal positioning across both large- and small-scale contexts and highlights the multi-faceted nature of intercultural communication in today ' s global world.

The volume establishes positioning primarily as the negotiation of interpersonal relationships, and

draws on concepts from across disciplines by way of reappraisal before applying them to two specific domains: MMORPGs (Massively Multiplayer Online Role-Playing Games) and private ELF couple interaction. While acknowledging and showcasing the unique features of positioning in these two contexts, Kl ö tzl and Swoboda point to their commonalities by looking at how language

and specifically English is used as a communicative resource in lingua franca situations. The book also identifies new directions for future methodological innovations in that it demonstrates how the same interaction can be looked at in methodologically-different ways and how the authors ' own positions projected on to such interaction create an integrated tri-partite perspective on

the two domains. Shedding light on interpersonal positioning in different contexts and in turn on global communication more generally, this book will be of particular interest to students and researchers in discourse analysis, pragmatics, computer-mediated communication, sociolinguistics, and applied linguistics. "The book is concerned with the interaction of syntax, information structure and prosody in the history of English, demonstrating this with a case study of object topicalization. The approach is data-oriented, using material from syntactically parsed digital corpora of Old, Middle and Early Modern English, which serve as a solid foundation for conclusions. The use of object topicalization

underwent a sharp decline from Old English until today. In the present volume, a basic prosodic well-formedness condition, the Clash Avoidance Requirement, is identified as the main factor for this change. With the loss of V2-syntax, object topicalization led more easily to cases in which two focalized phrases, the topicalized object and the subject, are adjacent. The two focal accents on these phrases would produce a clash, thus

violating the Clash Avoidance Requirement. In order to circumvent this, the use of topicalization in critical cases is avoided. The Clash Avoidance Requirement is highly relevant also today, as experimental data on English and German show. Further, the Clash Avoidance Requirement helps to explain the well-known syntactic structure of the left periphery in Old English. An analysis positing two subject positions is defended in

the study. The variation of these subject positions is shown to depend not on pronominal vs. lexical status of the subject but on information structural properties."--Publisher's website.

Towards Dialogic

Teaching, this book

shows how and why the

dialogic approach has a positive impact on student engagement and learning. It sets out the evidence, examines the underpinning ideas and issues, and offers guidance and resources for the planning, implementation and review of effective dialogic teaching in a wide range of educational settings.

Dialogic teaching harnesses the power of talk to engage students ' interest, stimulate their

thinking, advance their understanding, expand their ideas and build and evaluate argument, empowering them for lifelong learning and for social and democratic engagement. Drawing on extensive published research as well as the high-profile, 5000-student trial and independent evaluation of Alexander ' s distinctive approach to dialogic teaching in action, this book: Presents the case for

treating talk as not merely incidental to teaching and learning but as an essential tool of education whose exploitation and development require understanding and skill; Explores questions of definition and conceptualisation in the realms of dialogue, argumentation and dialogic teaching, revealing the similarities and differences between the main approaches;

Discusses evidence that has enriched the debate about classroom talk in relation to oracy, argumentation, student voice and philosophy for children as well as dialogic teaching itself; Identifies what it is about dialogic teaching that makes a difference to students ' thinking, learning and understanding; Presents the author ' s rationale and framework for dialogic teaching, now completely revised and

much expanded; Proposes a professional development strategy for making dialogic teaching happen which, like the framework, has been successfully trialled in schools; Lists resources from others working in the field to support further study and development; Includes an extensive bibliography. Robin Alexander ' s A Dialogic Teaching Companion, like its popular predecessor Towards

Dialogic Teaching, aims to support the work of all those who are interested in the quality of teaching and learning, but especially trainee and serving teachers, teacher educators, school leaders and researchers.
