HWM

This classic book on available light photography is back, thoroughly updated for digital photography and, for the first time, is packed with stunning, full color images throughout. Creating great images under less-than-ideal lighting conditions is one of the most difficult, yet rewarding, experiences in photography. Challenge yourself, and with this book by your side you won't be disappointed. Photography expert Joe Farace and Pulitzer Prize winner Barry Staver use real-world examples of their own images to give you invaluable advice on how to get the shot right the first time. From practical tips, such as how to deal with inclement weather while shooting outdoors, to detailed information about getting great shots at your cousin's or your client's wedding, to brand new chapters on noise and white balance, you'll find everything that you need to turn your ordinary night and low-light shots into masterful works of art.

The best digital tips...from the world's leading digital photo periodical! PCPhoto presents the ultimate beginners' volume on going digital. It's packed with the magazine's best how-tos and tip-oriented articles, and covers information that's indispensable for the newcomer. In short, it serves as a welcoming portal into the digital world. Shooting techniques, cameras, and accessories are just the beginning. There's advice on using the camera controls and making sense of histograms, as well as coverage of a wide range of image processing options available in the digital darkroom. Check out the details of different types of editing software, and gain fundamental knowledge on how to create the best inkjet prints possible. There are 10 recipes for producing great photos, courtesy of PCPhoto editor Rob Sheppard and Wes G.

Pitts; a list of digital dos and don'ts; guidance on color correction; and much, much more.
