Adrian Holloway was only seventeen when he left the Royal Naval College at Dartmouth in 1940 and joined HMS Valiant as a Midshipman, sharing a gunroom with Midshipmen Terry Lewin and HRH Prince Philip. He arrived in the Mediterranean in time to witness the darkest days of the Mediterranean Fleet – providing cover for the Fleet Air Arm 's raid on Taranto, fighting at the Battle of Matapan and taking part in the evacuation of Crete – during which time the Royal Navy 's vessels were decimated. He also witnessed the sinking of HMS Barham, and after returning from an appointment to the Australian destroyer HMAS Nizam, was back on board Valiant when Italian frogmen mined her in Alexandria Harbour in 1941. In *From Dartmouth to War* Adrian Holloway presents a fascinating first-hand account of the war at sea, vividly recalling what it was like to be in battle whilst still little more than a schoolboy. He describes the transition from the safety of Dartmouth to the terror and confusion of the open ocean, at a time when Britain stood alone against the Axis. Complete with personal photographs, track charts and naval signals, this book provides an invaluable insight into the wartime activities of a junior officer.

**Liverpool and Manchester Photographic Journal** HarperCollins  
In *Uses of Immobilized Biological Compounds* the reader will find a comprehensive survey of the field written by acknowledged experts who met in Brixen, Italy, between May 9 and 14, 1993 for a NATO Advanced

Research Workshop devoted to the topic. The resulting volume presents a critical review of the latest results in the area and sets guidelines for future research. The 53 reports presented here cover: (A) General Aspects of Immobilizing Biological Compounds; (B) Medical, Clinical and Pharmaceutical Applications; (C) Electrochemical Biosensors; (E) Defense Applications; (F) Immunosensors and Receptors; (G) Food, Environmental, Clinical and Analytical Applications; and (H) Biotechnology and Marketing. In short, all aspects of the area are presented, in a compact format which will appeal to undergraduates, technicians, and professional scientists in the food, clinical, environmental, pharmaceutical and industrial fields.

## Popular Photography Food & Agriculture Org.

The " Sustainable Cropland and Forest Management in Priority Agro-ecosystems of Myanmar " Project of FAO in Myanmar is a five-year project (2016-2021) funded by Global Environment Facility (GEF) and being jointly coordinated and implemented by the Ministry of Natural Resources and Environmental Conservation (MoNREC) and the Ministry of Agriculture, Livestock, and Irrigation (MoALI). The project has supported establishment of a National CSA at Yezin Agriculture University in Myanmar. One of the key activities of the National CSA Center is to organize annual workshop/conference to share ideas, opportunities and challenges with regards to CSA and SLM and to discuss on the way forwards. Such workshops will focus on different themes of CSA and SLM every year. Accordingly, the first workshop was organized by the CSA Center at YAU on 14th Sep 2018 and the theme of this workshop was " Promoting Climate Smart Agriculture in Myanmar " . This proceeding presents the background of the project and workshop and compiles all the papers presented during the workshop.

*Books in Print* Cambridge University Press  
*Crisis in Command*, written in the aftermath of the Vietnam War, details the mismanagement of the US Army's leadership. Former soldiers Richard A. Gabriel and Paul L. Savage provide documented evidence that the military forces of the United States

are ill-prepared for war, having been weakened by officer-corps members who have abandoned honor and integrity to further their individual careers.

## Economic World AVA Publishing

"My photographs are both real and surreal," Charles Harbutt writes of this book, containing some 120 examples of his work. "For a while I called them superbanalisms. I don't think of this book as a portfolio of my best work, but rather as an integrated set of photographs that express where I have been psychologically, emotionally, physically. In a way it is Bloom walking the world. The loneliness, alienation, and fears, the lusts and sexual sorrows, the difficulties of sustaining emotional relationships. The damage people do to each other and the delight they can and do give one another. Throughout the desire to break free. At the same time it is about what is specifically photographic about photography....&" Harbutt's art was developed within the documentary tradition that has nurtured such other Magnum photographers as Cartier-Bresson, Robert Capa, and Werner Bischof. Nevertheless, in the images caught and fixed so sharply here, Harbutt transcends this tradition, not by denying it, but by bridging the gap between the abstract or "pure&" photograph and the documentary statement. Although the book does not follow the too-prevalent narrative documentary pattern in which visual statements are in part determined by a preconceived verbal scenario, still the progression of the images reveals consistencies of theme and structure that are appropriate to a genuine book, as opposed to an exhibit of photographs unrelated except by quality that is reproduced in book format. The book is absolutely "literate&" in terms of the photographic medium itself: formal values and content are

so totally fused that one is able to "read" it many times and find deeper meanings each time. The subject matter Harbutt looks at and into is common to the experience of us all-but he sees it in an intensely uncommon, personal way, and in turn he allows us to share in his vision. The first three sections of the book reveal the World, the Flesh, and the Devil. "The World" brings the inanimate to life-automobiles and buses and buildings are seen largely in isolation from their human context and assume a reality and animation all their own. "The Flesh" is a revelation of pure humanity-children are caught in the act of growing up; adults are shown leaving clues to the meaning of their groping lives. "The Devil" is a nighttown of images of evil-religious incantations, sideshow bacchanals, dry bones in a coffin. In a final section, Harbutt-Bloom returns from his odyssey, bringing his travelog full circle. In "Home," he lovingly observes wooden chairs waiting in a garden, a boat in a bathtub, a curtain blowing in an upstairs window, a bird, a dog, a child at play, a family relaxing together under the warm rays of the sun.... Harbutt's work has appeared in all major international magazines and has been exhibited throughout the world.

*Basics Photography 02- Lighting* by David Pr kel is an essential guide to the creative use of light in capturing photographic images. The book explains the theory of how light 'works' for the photographer, encouraging the reader to explore and experiment. It argues for an understanding of lighting as a fundamental quality of good photography. Technical concepts and the use of different varieties of

light source are explained with the aid of clear diagrams and inspiring images. Lighting offers an essential introduction to the subject and represents a comprehensive reference for students and aspiring photographers.

Tilt and shift lenses offer tremendous creative possibilities for users of digital SLR and mirrorless cameras. This practical book explains the techniques that will help you take better photos - photos that don't distort or lose focus.

Assessing the benefits and pitfalls of a range of lenses, adapters, software and editing techniques, it guides you through the practicalities of working with these lenses and gives you the skills to use them to best effect. With stunning examples throughout, this book gives an overview of the different lenses available, and tips on how adapters can give tilt/shift options when using old medium-format lenses. It gives advice on how simple lens shift can change the entire look of your photos, and techniques for using lens tilt for focus control and close-up working.

Stunning examples show the use of tilt and shift lenses across a range of available focal lengths, both tripod-mounted and handheld.

*McBroom's Camera Bluebook* Macmillan

*Introduction to Optics* is now available in a re-issued edition from Cambridge University Press. Designed to offer a comprehensive and engaging introduction to intermediate and upper level undergraduate physics and engineering students, this text also allows instructors to select specialized content to suit individual curricular needs and goals. Specific features of the text, in terms of coverage beyond traditional areas, include extensive use of matrices in dealing with ray tracing, polarization, and multiple thin-film interference; three chapters devoted to lasers; a separate chapter on the optics of the eye; and individual chapters on holography, coherence, fiber optics, interferometry, Fourier optics, nonlinear optics, and Fresnel equations.
