Beartooth Mountain Press  
LLC

This book may seem horribly  
out of date since it spends

most of the time describing  
how to adapt compact film  
cameras for flight. This  
includes building large  
payload bays and methods of  
mechanically and/or  
electrically triggering the  
cameras. It's being re-issued  
because while the actual  
payloads being lofted are  
obsolete, the techniques of  
building sturdy payload bays  
for comparatively large, heavy

instruments and methods of mechanically and/or electrically triggering them is still relevant. In fact, even more so with the recent rise of university-level programs using rocketry as a teaching tool
