The lens is generally the most expensive and least understood part of any camera. In this book, Rudolf Kingslake traces the historical development of the various types of lenses from Daguerre's invention of photography in 1839 through lenses commonly used today.

From an early lens still being manufactured for use in low-cost cameras to designs made possible through such innovations as lens coating, rare-earth glasses, and computer aided lens design and testing, the author details each major advance in design and fabrication. The book explains how and why each new lens type was developed, and why most of them have since been abandoned. This authoritative history of lens technology also includes brief biographies of several outstanding lens designers and manufacturers of the past.

FINALIST - Charles Taylor Prize for Literary Non-Fiction (2012) FINALIST - Governor General's Literary Award - Non-Fiction (2012) FINALIST - BC Book Prize's Hubert Evans Non-Fiction Prize (2012) A son's decision to alter his father's last surviving suit for himself is the launching point for this powerful book – part personal memoir, part social history of the man's suit – about fathers and sons, love and forgiveness, and

learning what it means to be a man. For years, journalist and amateur tailor JJ Lee tried to ignore the suit hanging at the back of his closet. It was his father's suit. But when JJ decides to make the suit his own, little does he know he is about to embark on a journey to understand his own past. As JJ cuts into the jacket, he begins to piece together the story of his relationship with his father, a charismatic but troubled Montreal restaurateur whose demons brought tumult upon his family. JJ also recounts his own ups and downs during the year he spent as an apprentice at Modernize Tailors – the last of the great Chinatown suitmakers in Vancouver – where, under the tutelage of his octogenarian master tailor, he learns invaluable lessons about life. Woven throughout JJ's tale are stories of the suit's own evolution, illuminating how this humble garment has, for centuries, been the surprising battleground for the war between generations. Written with great wit, bracing honesty, and narrative verve, and featuring line drawings throughout by the author, *The Measure of a Man* is an unforgettable story of love, forgiveness, and discovering what it means to be your own man.

Tilt and shift lenses offer tremendous

creative possibilities for users of digital SLR and mirrorless cameras. This practical book explains the techniques that will help you take better photos - photos that don't distort or lose focus. Assessing the benefits and pitfalls of a range of lenses, adapters, software and editing techniques, it guides you through the practicalities of working with these lenses and gives you the skills to use them to best effect. With stunning examples throughout, this book gives an overview of the different lenses available, and tips on how adapters can give tilt/shift options when using old medium-format lenses. It gives advice on how simple lens shift can change the entire look of your photos, and techniques for using lens tilt for focus control and close-up working. Stunning examples show the use of tilt and shift lenses across a range of available focal lengths, both tripod-mounted and handheld.
