One of American Scientist's Top 100 Books on

Science, 2001 In 1992, the University of Texas Press published Before Writing, Volume I: From Counting to Cuneiform and Before Writing, Volume II: A Catalog of Near Eastern Tokens. In these two volumes, Denise Schmandt-Besserat set forth her groundbreaking theory that the cuneiform script invented in the Near East in the late fourth millennium B.C.—the world's oldest known system of writing—derived from an archaic counting device. How Writing Came About draws material from both volumes of this scholarly work to present Schmandt-Besserat's theory in an abridged version for a wide public and classroom audience. Based on the analysis and interpretation of a selection of 8,000 tokens or counters from 116 sites in Iran, Iraq, the Levant, and Turkey, it documents the immediate precursor of the cuneiform script./DIV Janey the Vet Blackstone Publishing Intensely private radio personality Art

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of

the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the

rest of his life.

Beauty in the Broken – Die Schönheit im Zerbrochenen

A sword of green glass. A key that opens passages between the worlds. The nameless warrior has nothing else. No allies, no armor, not even the memory of how he came to be trapped within this dying land, pursued across a red waste by the monstrous Shrivens. But all hope is not lost. There are other survivors amidst the desolation, holding clues as to where he has come from and what he must do: Amara, the Red Sword of her tribe, a beautiful and fiery swordswoman obsessed with destroying the demons that plague her people, and Valyra, a young sorceress who can weave the broken threads of this reality into something whole once more. Together they will try to resist the evil that stalks the wastes. But this world is only one among many, and in order to unravel his mysteries

the warrior must find the doorways which will allow him to stride between the stars and pass into even stranger lands . . . The *Cleansing Flame* is for readers over the age of 18. It contains a harem and explicit language and situations. *Freshwater Diatoms from Spitsbergen* Micro and Nano Technologies H.G. Liddell and R. Scott's *Greek-English Lexicon* (revised and augmented by H.S. Jones in 1940) has been the essential tool of advanced Greek scholars for 150 years; in order to update it a new Supplement has been published (OUP 1996) replacing that of 1968. In this provocative reconsideration both of its lexicographical principles and of individual articles, John Chadwick examines the need for further revision and expansion of the volume through a re-examination of the classical Greek vocabulary. A series of notes are presented, making important and stimulating contributions to the study of classical Greek lexicography, and offering many new interpretations of passages from familiar authors

based upon a lexicographical approach. Essential reading for all scholars of classical Greek.
