"...profoundly moving..." -Publishers Weekly Nelson Mandela's
two great-grandchildren ask their grandmother, Mandela's
youngest daughter, 15 questions about their grandad – the
global icon of peace and forgiveness who spent 27 years in
prison. They learn that he was a freedom fighter who put down
his weapons for the sake of peace, and who then became the
President of South Africa and a Nobel Peace Prize-winner, and
realise that they can continue his legacy in the world today.
Seen through a child's perspective, and authored jointly by
Nelson Mandela's great-grandchildren and daughter, this
amazing story is told as never before to celebrate what would
have been Nelson's Mandela 100th birthday.

. The book that takes a comprehensive look at the threat to
our food supply from genetic engineering. . 15,000 copies
sold in the first six months. . Includes new studies about the
dangers of genetically engineered food. . Refutes the "feed
the poor" propaganda spread by agribusinesses. . Is both
an expose and educational primer on this controversial
technology that is already a part of every American's diet. .
Explains the dangers of these foods to ourselves and our
environment in easily understood terms. Picture a world? .
Where the french fries you eat are registered as a pesticide,

not a food. . Where vegetarians unwittingly consume fish
genes in their tomatoes. . Where corn plants kill monarch
butterflies. . Where soy plants thrive on doses of herbicide
that kill every other plant in sight. . Where multinational
corporations own the life forms that farmers grow and legally
control the farmers' actions. That world exists These things
are all happening, and they are happening to you.
Genetically engineered foods--plants whose genetic
structures are altered by scientists in ways that could never
occur in nature--are already present in many of the products
you buy in supermarkets, unlabeled, unwanted, and largely
untested. The threat of these organisms to human and
environmental health has caused them to be virtually
banned in Europe, yet the U.S. government, working hand-
in-hand with a few biotech corporations, has actively
encouraged their use while discouraging labeling that might
alert consumers to what they are eating. The authors show
what the future holds and give you the information you need
to preserve the independence and integrity of our food
supply. What can you do? First, inform yourself. Genetically
Engineered Food: Changing the Nature of Nature is the first
book to take a comprehensive look at the many
ramifications of this disturbing trend. Authors Martin Teitel
and Kimberly Wilson explain what genetic engineering is
and how it works, then explore the health risks involved with
eating organisms never before seen in nature. They address
the ecological catastrophe that could result from these
modified plants crossing with wild species and escaping

human control altogether, as well as the economic devastation that may befall small farmers who find themselves at the mercy of mega-corporations for their livelihood. Taking the discussion a step further, they consider the ethical and spiritual implications of this radical change in our relationship to the natural world, showing what the future holds and giving you the information you need to act on your own or to join others in preserving the independence and integrity of our food supply.

Following the Pulitzer prize-winning collection Stag ' s Leap, Sharon Olds gives us a stunning book of odes. Opening with the powerful and tender " Ode to the Hymen, " Olds addresses and embodies, in this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its structures and pleasures. The poems extend parts of her narrative as a daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. In such poems as " Ode to My Sister, " " Ode of Broken Loyalty, " " Ode to My Whiteness, " " Blow Job Ode, " and " Ode to the Last Thirty-Eight Trees in New York City Visible from This Window, " Olds treats us to an intimate examination that, like all her work, is universal, by turns searing and charming in its honesty. From the bodily joys and sorrows of childhood to the deaths of those dearest to us, Olds shapes the world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

"Local editors Schaper and Horwitz have assembled a noteworthy collection of noir-infused stories mixed with laughter... The Akashic noir short-story anthologies are avidly sought and make ideal samplers for regional mystery collecting." --Library Journal "The best pieces in the collection turn the clichés of the genre on their head... and despite the unseemly subject matter, the stories are often surprisingly funny." —City Pages (Minneapolis) Brand-new stories from John Jodzio, Tom Kaczynski, and Peter Schilling, Jr., in addition to the original volume's stories by David Housewright, Steve Thayer, Judith Guest, Mary Logue, Bruce Rubenstein, K.J. Erickson, William Kent Krueger, Ellen Hart, Brad Zellar, Mary Sharratt, Pete Hautman, Larry Millett, Quinton Skinner, Gary Bush, and Chris Everheart. "St. Paul was originally called Pig's Eye's Landing and was named after Pig's Eye Parrant--trapper, moonshiner, and proprietor of the most popular drinking establishment on the Mississippi. Traders, river rats, missionaries, soldiers, land speculators, fur trappers, and Indian agents congregated in his establishment and made their deals. When Minnesota became a territory in 1849, the town leaders, realizing that a place called Pig's Eye might not inspire civic confidence, changed the name to St. Paul, after the largest church in the city... Across the river, Minneapolis has its own sordid story. By the turn of the twentieth century it was considered one of the most crooked cities in the nation. Mayor Albert Alonzo Ames, with the assistance of the chief of police, his brother Fred, ran a city so corrupt that according to Lincoln Steffans its 'deliberateness, invention, and avarice has never been equaled.' As recently as the mid-'90s, Minneapolis was called 'Murderopolis' due to a rash of killings that occurred over a long hot summer... Every city has its share of crime, but what makes the Twin Cities unique may be that we have more than our share of good writers to chronicle it. They are homegrown and they know the territory--how the cities look from the

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on

timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

In this inspirational and humorous collection of essays, author John Dietsch sees his addiction to and passion for fishing as a parable that can help us shift from compulsive thinking to mindfulness and a closer connection to God. From creating fishing scenes on the set of *A River Runs Through It* in Montana, to directing fly fishing shows in New Zealand and from exploring deep canyons in California to guiding in Colorado, John shares his experiences and asks the question: what are we really fishing for? Through John's journeys across the globe, we discover that the same pursuit in fishing—of what is elusive but attainable—can be applied to our own spiritual journey. In the end, Dietsch uncovers his own truth under the rocks of a childhood river, recognizing the loss of both his brothers as the path of acceptance and faith that is graced by waters.

Aiden From the second I saw her, I knew she'd be my ruin. Sitting all alone at the bar, she looked like an angel. Eurydice in human form; her beauty eclipsed by demons. Now, I'm one of them. The ghost she's tried for years to escape. Thinking I wouldn't be able to find her. But I never stopped trying, and now that I have, her past sins should be the least of her worries. Riley From the moment he saw me, I knew I'd ruin his life. Alone at the bar, I dared the monster to come and play. Orpheus in the flesh, with his sad songs and strange obsessions. I became one of them. The siren who calls to the darkest parts of him. Only, I disappeared before he could act on it. But now he's here, and he wants me to repent for my sins. *** *Vipers and Virtuosos is a full-length, standalone dark rockstar romance inspired by the myth of Orpheus and Eurydice. It is NOT fantasy, historical, or a retelling. If you are not a dark romance reader, this book may not be suitable for you. Reader discretion is advised.
