Harry N. Abrams

'The Wristwatch Handbook' provides the reader with a comprehensive anatomy of the mechanical wristwatch; every conceivable function and form. It is the foundational text for the novice and the reference book for the seasoned enthusiast. Where other books about watches focus on advising the collector, on a single brand, or on a timeline of key historical figures and events, 'The Wristwatch Handbook' takes a detailed look at mechanical wristwatch complications (functions) and leaves no stone unturned. The reader will gain the ability to identify a complicated watch from twenty paces and perform a top-to-bottom assessment of even the most exotic timepiece in a matter of seconds. Despite the functional obsolescence of the mechanical wristwatch (our phones, computers, even microwaves tell more accurate time), there are more varieties of mechanical watches available than ever before. Today, innovation is no longer exclusively preoccupied with accuracy; pioneer manufacturers are also exploring friction reduction, anti-magnetism, scratch resistance, dial decoration, exotic materials and so on.

Rapid shifts in technology and societal

changes accelerated by the Pandemic have fundamentally changed the way that customers experience luxury. While digital transformation has unlocked new opportunities to connect one-to-one with customers, the challenge for luxury brands is to engage with customers while protecting their brand equity and leveraging digital tools to build personal relationships with customers. Taking you beyond omni-channel marketing, this book takes a deep dive into the concept of omni-personal, which enables you to connect your brand to relevant and individual experiences. Highly practical in scope, it takes you on a journey to building individual and relevant experiences and relationships at scale. The authors answer the essential questions of who, why, how, what and when omni-personal matters most in luxury, offering best-practice examples, case studies and interviews with industry leaders. Ultimately, this book shows you how to embed the omni-personal strategy into your business and offers a framework to help you assess your organization's ability to deliver omni-personal marketing along the different channels and touchpoints within the customer journey. This book is for anyone who is interested in the future of luxury, including industry experts and brand managers who want a better understanding of the required steps towards an omni-personal customer relationship.

- The first complete book dedicated to one of the most desirable chronographs of the 1960s, Chronomaster Aviator Sea Diver by NIVADA & CROTON Chronomaster Aviator Sea Diver: this singular name belongs to one of the most original professional watches of the 1960s, combining an unparalleled number of functions with a timeless design. Created in 1961, this chronograph was produced for around ten years under several brand names, through a partnership between the Swiss company NIVADA SA and the American firm CROTON WATCH CO. This led to some of its dials bearing probably the most complicated name in watchmaking history: CROTON NIVADA GRENCHEM Chronomaster Aviator Sea Diver. Thanks to the authors' trademark rigorous methodology, the signature of the 'ONLY' reference works, this book reveals the incredible diversity of the Chronomaster models. It is intended both as an initiation for connoisseurs of exceptional watches and as a reference guide for collectors. This legendary watch will doubtless thus regain the place it deserves among the most desirable 1960s chronographs. William Kennedy (1814–1890) was an explorer and fur trader. In 1851 he was recommended to Lady Franklin as the commander of her second sponsored expedition in search of her husband, Arctic explorer Sir John Franklin (1786–1847), who had not returned from his 1845 expedition to chart the remaining unexplored section of the Arctic and the Northwest Passage. This volume, first published in 1853, contains Kennedy's account of his 1851 Arctic expedition to rescue Sir John Franklin. Written in the form of a diary, Kennedy describes in detail the hazardous conditions of the Arctic. The crew's experiences including

snow blindness, frostbite, scurvy and explorations of land on foot accompanied by Husky dogs are described in detail. Kennedy's use of Inuit survival methods and the type of provisions which were used are also described, providing valuable insights into early nineteenth century methods of Arctic exploration.

The watch has a long and fascinating history, from a fifteenth-century status symbol of the rich and powerful to the mass-produced everyday timepiece of modern times. This book describes the main technical developments across a 500-year timespan, from the beginnings in Germany and France, through the golden age of English horology in the 18th century, to the development of modern factory production in America and Switzerland. It also sets out to give the general reader and collector a grasp of the key technological developments in watch and sets the lives of the inventors and artisans in the context of the social and economic history of their times. With over 290 photographs and 3D diagrams, this book includes an extensive listing and history of watch brands and manufacturers to assist in identification along with a useful glossary of terms.

Two wealthy and powerful men engage in a decades-long contest to create and possess the most remarkable watch in history. James Ward Packard of Warren, Ohio, was an entrepreneur and a talented engineer of infinite curiosity, a self-made man who earned millions from his inventions, including the design and manufacture of America's first luxury car—the elegant and storied Packard. Henry Graves, Jr., was the very essence of blue-blooded refinement in the early 1900s: son of a Wall Street financier, a central figure in New York high society, and a connoisseur of beautiful things—especially fine watches. Then, as now, expensive watches were the ultimate sign of luxury and wealth, but in the early twentieth century the limitless ambition, wealth, and creativity of these two men pushed the boundaries of mathematics, astronomy, craftsmanship, technology, and physics to create ever more ingenious

timepieces. In any watch, features beyond the display of hours, minutes, and seconds are known as “complications.” Packard and Graves spurred acclaimed Swiss watchmaker Patek Philippe to create the Mona Lisa of timepieces—a fabled watch that incorporated twenty-four complications and took nearly eight years to design and build. For the period, it was the most complicated watch ever created. For years it disappeared, but then it surfaced at a Sotheby's auction in 1999, touching off a heated bidding war, shattering all known records when it fetched \$11 million from an anonymous bidder. New York Times bestselling author Stacy Perman takes us from the clubby world of New York high society into the ateliers of the greatest Swiss watchmakers, and into the high-octane, often secretive subculture of modern-day watch collecting. With meticulous research, vivid historical details, and a wealth of dynamic personalities, *A Grand Complication* is the fascinating story of the thrilling duel between two of the most intriguing men of the early twentieth century. Above all, it is a sweeping chronicle of innovation, the desire for beauty, and the lengths people will go to possess it.

“The watch must be original in design and conception and, when completed, beautiful in appearance.” —George Daniels, Watchmaking Master watchmaker and inventor George Daniels (1926–2011) was regarded as the finest exponent of his craft in the world. Over the course of his career he laboriously constructed twenty-five mechanical watches using antiquated tools and creating almost every component by hand. Each is a work of great originality and exceptional beauty, and his creations are appreciated as milestones in the art of watchmaking. While admired for their lucidity of appearance and unadorned dials, Daniels's watches feature a raft of exquisite complications, such as

chronographs, thermometers and power reserve indicators. His more intricate designs also incorporate perpetual calendars and minute repeaters, as well as indicators displaying mean solar and sidereal time, the age and phases of the moon, and the equation of time. Most significant of all Daniels's contributions to the field of mechanical horology is his revolutionary invention: the co-axial escapement. This, the first noteworthy advance in practical watch design since Thomas Mudge's lever escapement of 1754, helped to save a mechanical watch industry in danger of being overwhelmed by mass-produced quartz wristwatches. Detailed photographs of all of Daniels's unique watches (both dial and movement) can be seen here, along with rare and previously unpublished images from Daniels's own archive of photographs and working drawings. Michael Clerizo worked closely with George Daniels in the preparation of this book, the artist recounting episodes from his life and career over their innumerable conversations at his home on the Isle of Man. That biography helps ensure the book is a fitting and authentic tribute to the greatest watchmaker of the modern era.
