The Omega Watch Collector Guide - Fourth Color Edition Unofficial Guides - The first major monograph on Andrew Grima, arguably Britain's greatest jewelry maestro - A glittering retrospective that encompasses Andrew Grima's life, career and legacy - Detailed pictures demonstrate Grima's impeccable artistry as a modernist designer - Preface by TV celebrity and Antique Roadshow expert, Geoffrey Munn The father of modern jewelry, the golden engineer, the King of Bling... These are just some of the epithets assigned to Andrew Grima, the British genius who marched in the vanguard of a 1960s London-based movement that created a new vocabulary for jewelry design. Jeweler to the royals and the jet set, to the rule makers and the tastemakers, Grima was a feted celebrity who appeared on talk shows, in Path é newsreels and in advertisements for Canada Dry. He won The Queen's Award for Export, The Duke of Edinburgh's Prize for Elegant Design and a record 11 De Beers Diamonds International Awards (the 'Oscars' of the jewelry world). His business empire spanned the globe. Yet his name fell prey to time and changing tastes, and today, with the exception of jewelry snobs, dealers and auction houses, he is all but forgotten. This book illuminates the career of a man who participated in a golden age of British creativity. It contains a dazzling array of never-before-seen sketches, designs and photographs from the Grima archives and includes a sparkling preface from the doyen of jewelry experts, TV celebrity Geoffrey Munn. A must-buy publication for art and jewelry lovers alike.

*The Omega Watch Collector Guide - Third Edition* Watchprint.com Sarl - The first complete book dedicated to one of the most desirable chronographs of the 1960s, Chronomaster Aviator Sea Diver by NIVADA & CROTON Chronomaster Aviator Sea Diver: this singular name belongs to one of the most original professional watches of the 1960s, combining an unparalleled number of functions with a timeless design. Created in 1961, this chronograph was produced for around ten years under several brand names, through a partnership between the Swiss company NIVADA SA and the American firm CROTON WATCH CO. This led to some of its dials bearing probably the most complicated name in watchmaking history: CROTON NIVADA GRENCHEM Chronomaster Aviator Sea Diver. Thanks to the authors' trademark rigorous methodology, the signature of the 'ONLY' reference works, this book reveals the incredible diversity of the Chronomaster models. It is intended both as an initiation for connoisseurs of exceptional watches and as a reference guide for collectors. This legendary watch will doubtless thus regain the place it deserves among the most desirable 1960s chronographs. *Luxury Watches Investment - Two Chapters* Damiani Editore  
A fantastic reference work for the novice or the seasoned watch enthusiast. Fully illustrated with 470 color photographs. Brand-Agnostic. Features a vast array of timepieces from over 90 manufacturers. Despite the functional obsolescence of the mechanical wristwatch (our phones and computers tell more accurate time) the early 21st Century has seen a boom in the development, production, and appreciation of all things horological. Whether it is presented to the collector as an alternative investment, as a feat of micro-mechanical technology, or as a showcase of artisanal mastery, the mechanical wristwatch has never possessed more forms, functions or facets than it does today. The Wristwatch Handbook is written from the epicenter of a renaissance, a place in time between the Quartz revolution and the rise of the smart device - where the mechanical wristwatch is the antidote to the microprocessor and the permanent buzz of your inbox. From the multi-axis tourbillon, to the split-second chronograph, to the sidereal sky chart, The Wristwatch Handbook covers it all and does so with more than 470 rich illustrations from over 90 of the World's leading brands. The book is separated into two sections. The first section provides the reader with a comprehensive understanding of the mechanical movement. Its chapters explore power, transmission, distribution and regulation illustrating the basic concepts before considering the innovation and complexity that takes place further toward the cutting edge. From the fifty-day power reserve, to the constant force mechanism, and the 1,000Hz mechanical escapement, section 1 will allow the reader to understand and appreciate what is happening beneath the dial of their watch. Section two allows the reader to take this understanding and apply it to the vast range of complications (functions) that exist in modern horology. Each chapter showcases a distinct category of complication. For example, the regatta timer, pulsometer, and monopusher chronograph join a host of others in a chapter entitled 'Recording Lapses of Time'; The power reserve indicator, dynamograph, and crown position indicator are

featured in a chapter for 'Power and Performance Indication'; The moon phase indicator, annual calendar, and planetarium can be found in the 'Astronomical Complications' chapter. Once the functional categories are exhausted, the final three chapters explore whimsical complications that have little regard for practical function, novelty time indication, and the 'super-complicated' watch - a rare breed of timepiece that houses an intimidating host of complications featured throughout the book. Upon completion of The Wristwatch Handbook the reader will be able to identify even the most exotic complication from across the room, and be able to share their appreciation and understanding of what makes it so useful and compelling. The Wristwatch Handbook is "brand agnostic", using only those watches that most aptly illustrate the given subject-matter. As a consequence the book places equal emphasis on the classic and the cutting edge, on watches produced in large volume or exclusive runs, by industry-leading technology or at the hand of a master. In doing so the book provides an unparalleled range of watches from over 90 brands, allowing the reader to determine for themselves which brands, complications, and styles they will build their collection from.

An inside look at the world's first conceptual and artistic watchmaking laboratory, from its processes to its inspirations The MB&F adventure starts in Geneva in 2005. After 15 years working for prestigious names in the world of fine watchmaking, Maximilian Büsser launched Maximilian Büsser & Friends (MB&F), the world's very first conceptual and artistic watchmaking laboratory. MB&F designs and manufactures limited series of radical, innovative, and extraordinary watches that are always the result of a close collaboration between exceptional independent professional watchmakers and the overflowing imagination of the brand's founder. MB&F reinterprets horological tradition into three-dimensional mechanical sculptures that tell time. From the launch of the first Horological Machine in 2007, followed by the Legacy Machine in 2011, to the most recent creations, MB&F's watches and clocks are genuine kinetic sculptures. Beyond a mere reasoned catalogue, MB&F: The First Fifteen Years invites the reader to dive into the process of creating and fabricating these incredible watches. Brimming with technical prowess, surrealist inspirations, and science fiction, this book is an invitation to discover the watchmaking of the future.
