The Essential Schopenhauer Alpha Edition

Arthur Schopenhauer (22 February 1788 – 21 September 1860) was a German philosopher. He is best known for his 1818 work *The World as Will and Representation*, in which he argues that the phenomenal world is driven by a metaphysical will that perpetually and malignantly seeks satiation. He also wrote influentially on aesthetics, ethics, and religion. Transcendental idealism formed the basis for much of his thought, and his atheistic philosophy has been described as an exemplary manifestation of philosophical pessimism. Finding his philosophical conclusions to be compatible with those of much Eastern philosophy, his solutions to the problems of existence and suffering were consequently similar to those of Vedantic and Buddhist thinkers. Schopenhauer's influence has proven profound across various disciplines; those who have cited his influence include Friedrich Nietzsche, Richard Wagner, Leo Tolstoy, Ludwig Wittgenstein, Erwin Schrödinger, Sigmund Freud, Albert Einstein, Otto Rank, Carl Jung, Joseph Campbell, Thomas Mann, and Jorge Luis Borges, among others.

The Essays of Schopenhauer DigiCat

A disciple of Kant and a significant factor in shaping Nietzsche's thinking, Arthur Schopenhauer worked from the foundation that all knowledge derives from our experience of the world but that our experience is necessarily subjective and formed by our own intellect and biases: reality, therefore, is but an extension of our own will. In this essay, translated by THOMAS BAILEY SAUNDERS (1860-1928) and first published in English in the 1890s, Schopenhauer offers his outlook on human nature... and a pessimistic one it is, for Schopenhauer saw life through a Buddhist-like lens of desire leading to suffering, and the abjuration of desire as the only path to temporary relief. Here, the philosopher examines human institutions such as government, human ideals such as free will, and human understanding of character and

morality, and finds underlying them a fatalistic impulse driving culture from extremes of despotism to those of anarchy, with little stopping along the way. Students of philosophy and of 19th-century intellectualism will find this a fascinating read.

Arthur Schopenhauer (1788-1860) was a German philosopher best known for his work *The World as Will and Representation*. He responded to and expanded upon Immanuel Kant's philosophy concerning the way in which we experience the world. His critique of Kant, his creative solutions to the problems of human experience and his explication of the limits of human knowledge are among his most important achievements. His metaphysical theory is the foundation of his influential writings on psychology, aesthetics, ethics, and politics which influenced Friedrich Nietzsche, Wagner, Ludwig Wittgenstein, Sigmund Freud and others. He said he was influenced by the Upanishads, Immanuel Kant, and Plato. References to Eastern philosophy and religion appear frequently in his writing. He appreciated the teachings of the Buddha and even called himself a Buddhist. He said that his philosophy could not have been conceived before these teachings were available. He called himself a Kantian. He formulated a pessimistic philosophy that gained importance and support after the failure of the German and Austrian revolutions of 1848.

This book introduces the reader to the literary work and to an understanding of its cultural background and its specific features. In doing so, it refers to two main traditions of Western culture: one of aesthetics and the theory of art and the other of literary theory. In our postmodern world, language and artistic creation (and above all literature as the art of language) occupy a special role in understanding the human world and become existential issues. A critical attitude requires knowledge of the relevant past in order to understand what we are today. The author presents key topics, ideas, and representatives of aesthetics, theory, and the interpretation of works of art in an historical perspective, in order to explain the Western tradition with constant attention to the present condition. Aesthetics, Theory and Interpretation of the Literary Work offers an outline of essential concepts and authors of aesthetics and theories of the literary work, presenting basic topics and ideas in their historical context and development, considering their relevance to the contemporary debate, and highlighting the specificity of the experience of the art work in our present world. The World as Will and Representation, Vol. 1 Washington, Dunne

One of the greatest philosophers of the nineteenth century, Schopenhauer (1788-1860) believed that human action is determined not by reason but by 'will' - the blind and irrational desire for physical existence. This selection of his writings on religion, ethics, politics, women, suicide, books and many other

themes is taken from Schopenhauer's last work, *Parerga and Paralipomena*, which he published in 1851. These pieces depict humanity as locked in a struggle beyond good and evil, and each individual absolutely free within a Godless world, in which art, morality and self-awareness are our only salvation. This innovative - and pessimistic - view has proved powerfully influential upon philosophy and art, directly affecting the work of Nietzsche, Wittgenstein and Wagner among others.

Who are We? Penguin

"These essays are a valuable criticism of life by a man who had a wide experience of life, a man of the world, who possessed an almost inspired faculty of observation. Schopenhauer, of all men, unmistakably observed life at first hand. There is no academic echo in his utterances; he is not one of a school; his voice has no formal intonation; it is deep, full-chested, and rings out its words with all the poignancy of individual emphasis, without bluster, but with unfailing conviction. He was for his time, and for his country, an adept at literary form; but he used it only as a means. "
