When that icon flashes on the screen, the One Touch Ultra has been calibrated and is ready for use. Tips. If a number appears on the screen when you place the test strip into the monitor, it has already been calibrated. If the number on the screen doesn't match the code number for the test strips, press the "C" button until the two numbers match.

2. On a clean nonporous surface place two drops of solution without letting the tip of the bottle touch the nonporous surface. If using side-access test strips you'll want to place the drops near the edge of the surface so you can bring the test strip up to the drop. 3. DO NOT USE the first drop. 4. Test using the second drop. 5.
