What if you had been there on the night that Jesus was born? What if you could have held the infant Son of God, when He was only a few minutes old? How would it feel to have God Himself in your arms, vulnerable, approachable, and unassuming? In “A Ragamuffin Christmas” Craig Daliessio provides just that view of the Nativity. Far from the usual retelling of a baby, some shepherds, and the Virgin Mary; this is the story of criminals, broken hearted moms, scandalous characters, and legendary Saints, each granted their own visit with the newborn King of Kings. The people and images are unmistakable...and the result of each interaction is life changing. This is the Christmas story as it’s never been told before.

Type 1 Diabetes in Children, Adolescents and Young Adults John Wiley & Sons  
Passwords are not the problem. The management of passwords is the real security nightmare. User authentication is the most ignored risk to enterprise cybersecurity. When end users are allowed to generate, know, remember, type and manage their own passwords, IT has inadvertently surrendered the job title Network Security Manager to employees - the weakest link in the cybersecurity chain. Dovell Bonnett reveals the truth about the elephant in the room that no one wants to mention: Expensive backend security is worthless when the virtual front door has a lousy lock! Dovell proves that making passwords secure is not only possible, passwords can actually become an effective, cost efficient and user friendly feature of robust cybersecurity. After examining how encryption keys are secured, this book introduces a new strategy called Password Authentication Infrastructure (PAI) that rivals digital certificates. Passwords are not going away. What needs to be fixed is how passwords are managed.

How to Become an Expert on Your Own Diabetes Michael Grant

Three young children, Mal, Ari and Martha, have been "touched" and are in possession of enormous talents, bestowed on them by a chance encounter with the Young Master. Now Ari, Mal and Martha find themselves in the wrong place and time because Ari has done the unthinkable, resulting in a perpetual red dawn. But that is the least of their worries! Ari is on the run, while Mal and Martha attempt to keep their enemy at bay. The Strange Man is back and he's got even more sinister tricks up his sleeve ...

Diabetes Mellitus and Oral Health: An Interprofessional Approach is a practical tool for dentists and dental hygienists providing oral health care to patients with diabetes mellitus.

Firmly grounded in the latest evidence, the book addresses medical considerations, dental considerations, and case scenarios from clinical practice in three easily accessible sections. The first section on medical considerations reviews the definition of diabetes and discusses underlying pathologic mechanisms, classification, diagnosis, and medical complications of the disease. It also promotes the comprehensive management of patients with diabetes in the dental office, with a thorough discussion of lifestyle changes and medications used to treat diabetes. The second section on dental considerations provides guidance on how treat patients with diabetes. Oral complications will be covered in detail, with a focus on management and treatment strategies that can be used in the dental office. The third section includes multiple case studies illustrating common complications and how-to instruction on appropriate patient management. Ideal for all members of the dental team, Diabetes Mellitus and Oral Health is an essential tool for providing optimal clinical care to patients with diabetes.

This is your brain on Grant Petersen: Every comfortable assumption you have about a subject is turned upside down, and by the time you finish reading you feel challenged, energized, and smarter. In Just Ride— “ the bible for bicycle riders ” (Dave Eggers, New

York Times Book Review)—Petersen debunked the bicycle racing— industrial complex and led readers back to the simple joys of getting on a bike. In *Eat Bacon, Don't Jog*, Petersen upends the last 30 years of conventional health wisdom to offer a clear path to weight loss and fitness. In more than 100 short, compelling directives, *Eat Bacon, Don't Jog* shows why we should drop the carbs, embrace fat, and hang up our running shoes, with the latest science to back up its claims. Diet and Exercise make up the bulk of the book, with food addressed in essays such as “Carbohydrate Primer”—and why it's okay to eat less kale—and “You'll Eat Less Often If You Eat More Fat.” The exercise chapters begin with “Don't Jog” (it just makes you hungry and trains muscle to tolerate more jogging while raising stressors like cortisol) and lead to a series of interval-training exercises and a suite of kettlebell lifts that greatly enhance strength and endurance. The balance of the book explains the science of nutrition and includes more than a dozen simple and delicious carb-free recipes. Thirty years ago Grant Petersen was an oat-bran-, egg-white-, lean-meat-eating exercise fanatic who wasn't in great shape despite all that. Today, at sixty, he is in the best shape of his life with the blood panel to prove it.

*Ending the War on Drugs in a System of Toleration, Counseling and Control* a System to Prevent Access by Minors, Reduce Addiction and Crime, and End the Harms of Prison Terms for Drug Users John Wiley & Sons Details how the nation can bring about a fundamental change in our failed and inhumane national drug policy. Shows how the harms and perverse incentives created by drug prohibition can be eliminated through an adult use tolerant dispensary system tightly controlled against access by minors, the age group where 90% of addictions begin. Proposes a scalable, state run system, which can begin with pilot programs in selected counties whose success can be emulated in others and so spread across the country.

Qualified adults are allowed to join a confidential program that allows them to purchase drugs and paraphernalia manufactured and dispensed under FDA regulations, at below street prices. Purchase is through a tightly controlled remote ordering/delivery system, preventing access by minors. To qualify, users commit to regular contact with counselor/monitors, or "coaches". The coaches maintain contact with the users to promote responsible use, to keep them informed of current drug information and risks, and to serve as helpful confidants when someone signals a readiness to discuss rehab. The book shows how this system will1. Increase users' willingness and ability to seek abstinence over time and at a pace commensurate with their individual circumstances and conditions;2. Employ market forces to destroy the business of the pervasive drug dealers and violent traffickers; 3. End the accessibility to drugs of teens and preteens;4. Improve health and safety in our communities; and5. Release tax dollars (criminal justice costs) for better purposes, including education and addiction treatment.6. Provide a solution to the opioid overdose and death epidemic by furnishing users with safely compounded drugs certified as to purity and potency. Most drug users eventually quit on their own without treatment. Many more will, given the chance, seek treatment in support groups and professional rehab centers. In this use tolerant program with information rich counseling and controls against irresponsible use, the natural maturing toward quitting can be encouraged and even accelerated. The myriad details necessary to make such a plan work properly and its benefits are presented. A collateral and major benefit of killing the drug trade through natural market forces, as described, is the curtailment of the illicit drug trade and its associated crime and violence, and a reduction in prison populations and related costs. Of even greater importance is the protection against access to drugs by minors, which has been shown infeasible in a system of

prohibition. Legal markets can be controlled, where powerful illegal trafficking cannot be. it is critically important to society that we end access to drugs by minors, which sets so many on a course of idleness and crime.

*Hallowed Halls Createspace Independent Publishing Platform* A condensed, student-friendly version of Tietz Textbook of Clinical Chemistry, this text uses a laboratory perspective to provide you with the chemistry fundamentals you need to work in a real-world, clinical lab. Accurate chemical structures are included to explain the key chemical features of relevant molecules. Offering complete, accurate coverage of key topics in the field, it's everything that you expect from the Tietz name! More than 500 illustrations and easy-to-read tables help you understand and remember key concepts. Key words, learning objectives, and other student-friendly features reinforce important material. Chapter review questions are included in an appendix to test your knowledge. A two-color design makes it easier to read and easy to find important topics. In-depth, reader-friendly content is appropriate for MT/CLS and MLT/CLT students and may also be used by laboratory practitioners, pathology residents, and others. A new chapter on newborn screening discusses the basic principles, screening recommendations, inborn errors, methods, and interpretation of results. A comprehensive glossary provides easy-to-find definitions of key terms. An Evolve website provides regular updates of content, answers to review questions, and web links to related sites for further research and study.

New startups are created every day around the world, with many founders dreaming of millions of users and billions of dollars. But the harsh reality is that very few will succeed. How can entrepreneurs stack the odds in their favor? By learning from the experiences of startup founders, executives, and investors who've been there before. That's exactly what "How to Start a Startup" provides, sharing essential lessons from 25+ Silicon Valley insiders who've faced the challenges of starting a new business and come out swinging. Based on a Stanford University course taught by Y Combinator (the

---

prestigious startup accelerator behind companies like Dropbox and Airbnb), this in-depth reference guide features advice from experts like: - Reid Hoffman, LinkedIn co-founder - Dustin Moskovitz, Facebook co-founder - Paul Graham, Y Combinator co-founder - Marc Andreessen and Ben Horowitz, co-founders of Netscape and Andreessen Horowitz venture capital firm - Peter Thiel, co-founder of PayPal and Founders Fund, early Facebook investor - Ben Silbermann, Pinterest co-founder and CEO

Nominated as "Book of the Year" by Product Hunt (the leading Silicon Valley community for discovering the best new products), "How to Start a Startup" reveals the secrets to raising money, building products users love, hiring a great team, getting press coverage, attracting customers, growing your business, and more. No matter what type of product you're creating (web, mobile, hardware, online-to-offline, etc.) or what audience you're targeting (consumers or the enterprise), this playbook will give you all the information necessary to launch and scale a successful startup. This book was created independently by the publishers and all net proceeds will go to support charitable causes promoting wider access to opportunity for all.
