In Planet Beethoven,
Mina Yang makes the
compelling case that
classical music in the
twenty-first century is
just as vibrant and
relevant as ever—but with
significant changes that
give us insight into the
major cultural shifts of
our day. Perusing events,
projects, programs,

writings, musicians, and
compositions, Yang shines
a spotlight on the
Western art music
tradition. The book
covers an array of topics,
from the use of
Beethoven ' s " F ü r Elise
in YouTube clips and hip-
hop, to the marketing
claims of Baby Einstein
products, and the new
forms of music education
introduced by Gustavo
Dudamel, conductor of the
Los Angeles
Philharmonic. While the
book is global in its
outlook, each chapter
investigates the unique
attributes of a specific
performer, performance,
or event. One chapter
reflects on Chinese
pianist Yuja Wang ' s
controversial
performance at the
Hollywood Bowl, another
explores the highly
symbolic Passion 2000
Project in Stuttgart,
Germany. Sure to be of
interest to students,
professionals, and
aficionados, Planet

Beethoven traces the
tensions that arise from
the " classical " nature of
this tradition and our
rapidly changing world.

No Sleep is a visual history
of the halcyon days of New
York City club life as told
through flyer art. Spanning
the late 80s through the late
90s, when nightlife buzz
travelled via flyers and word
of mouth, No Sleep features
a collection of artwork from
the personal archives of
NYC DJs, promoters, club
kids, nightlife impresarios,
and the artists themselves.
Club flyers, by design, were
ephemeral objects
distributed on street
corners, outside of
nightclubs and concert halls,
in barbershops and retail
shops, and were not
intended to be preserved for
posterity. Through the 90s,
they became both
increasingly prevalent and
more sophisticated as

printing technology evolved. Overnight, however, with the advent of the internet, the flyer essentially disappeared, despite it being common at one time for promoters to print thousands of flyers for any given event. Recently, these flyers have become sought-after collector's items."

Close readings of ostensibly "blank" works—from unprinted pages to silent music—that point to a new understanding of media. In *No Medium*, Craig Dworkin looks at works that are blank, erased, clear, or silent, writing critically and substantively about works for which there would seem to be not only nothing to see but nothing to say. Examined closely, these ostensibly

contentless works of art, literature, and music point to a new understanding of media and the limits of the artistic object. Dworkin considers works predicated on blank sheets of paper, from a fictional collection of poems in Jean Cocteau's *Orphée* to the actual publication of a ream of typing paper as a book of poetry; he compares Robert Rauschenberg's *Erased De Kooning Drawing* to the artist Nick Thurston's erased copy of Maurice Blanchot's *The Space of Literature* (in which only Thurston's marginalia were visible); and he scrutinizes the sexual politics of photographic representation and the implications of obscured or obliterated subjects of photographs. Reexamining the famous case of John Cage's *4'33"*, Dworkin links Cage's composition to Rauschenberg's *White Paintings*, Ken Friedman's *Zen for Record* (and Nam June Paik's *Zen for Film*), and other works, offering also a "guide to further listening" that surveys more than 100 scores and recordings of "silent" music. Dworkin argues

that we should understand media not as blank, base things but as social events, and that there is no medium, understood in isolation, but only and always a plurality of media: interpretive activities taking place in socially inscribed space.

High Fidelity John Wiley & Sons
A member of Muddy Waters' legendary late 1940s-1950s band, Jimmy Rogers pioneered a blues guitar style that made him one of the most revered sidemen of all time. Rogers also had a significant if star-crossed career as a singer and solo artist for Chess Records, releasing the classic singles "That's All Right" and "Walking By Myself." In *Blues All Day Long*, Wayne Everett Goins mines seventy-five hours of interviews with Rogers' family, collaborators, and peers to follow a life spent in the blues. Goins' account takes

Rogers from recording Chess classics and barnstorming across the South to a late-in-life renaissance that included new music, entry into the Blues Hall of Fame, and high profile tours with Eric Clapton and the Rolling Stones. Informed and definitive, *Blues All Day Long* fills a gap in twentieth century music history with the story of one of the blues' eminent figures and one of the genre's seminal bands.

This volume is the most definitive monograph to be published on Josef Mueller-Brockmann. It traces Mueller-Brockmann's life from childhood through his early training, rarely seen designs for the theater, famous posters for the Zurich art scene, corporate design work for clients like IBM, and, finally, his efforts to educate

young designers. With assistance from the Museum für Gestaltung, Zurich and the Josef Mueller-Brockmann Archive, this book is extensively illustrated with completed works, period photography, rare sketches, concept drawings, and personal photos. Genealogy of the Lefferts Family, 1650-1718 University of Illinois Press "Noise/Music" looks at the phenomenon of noise in music, from experimental music at the early 20th century to the Japanese noise, music and glitch electronica of today. ... While it provides an excellent historical overview, the book's main concern is in the noise/music that has emerged since the mid 1970s, whether through industrial music, punk, free jazz or the purer noise of Merzbow. The book progresses seamlessly from discussions of John Cage, Erik Satie and Pauline Oliveros through to bands like Trobbling Gristle and the Boredoms. The author also examines the concept of noise from a philosophical perspective.

Underpinned throughout by the ideas of Adorno, Deleuze and others, the author's writing is sharp and erudite. -- Summarized from back cover.

The complex material histories of the Nintendo Entertainment System platform, from code to silicon, focusing on its technical constraints and its expressive affordances. In the 1987 Nintendo Entertainment System videogame *Zelda II: The Adventure of Link*, a character famously declared: I AM ERROR. Puzzled players assumed that this cryptic message was a programming

flaw, but it was actually a clumsy Japanese-English translation of "My Name is Error," a benign programmer's joke. In *I AM ERROR* Nathan Altice explores the complex material histories of the Nintendo Entertainment System (and its Japanese predecessor, the Family Computer), offering a detailed analysis of its programming and engineering, its expressive affordances, and its cultural significance. Nintendo games were rife with mistranslated texts, but, as Altice explains, Nintendo's translation challenges were not just linguistic but also material, with consequences beyond simple misinterpretation. Emphasizing the technical and material evolution of Nintendo's first cartridge-based platform, Altice describes the development of the Family Computer (or Famicom) and its

computational architecture; the "translation" problems faced while adapting the Famicom for the U.S. videogame market as the redesigned Entertainment System; Nintendo's breakthrough console title *Super Mario Bros.* and its remarkable software innovations; the introduction of Nintendo's short-lived proprietary disk format and the design repercussions on *The Legend of Zelda*; Nintendo's efforts to extend their console's lifespan through cartridge augmentations; the Famicom's Audio Processing Unit (APU) and its importance for the chiptunes genre; and the emergence of software emulators and the new kinds of play they enabled.
