Fretting about these on sites, different countries adopt different measures on sites. This book firstly sketches the construction accidents on sites, followed by a review on safety measures in some of the developing countries such as Bermuda, Egypt, Kuwait and China; as well as developed countries, for example, the United States, France and Singapore. It also highlights the enormous compensation costs with the courts' experiences in the United Kingdom and Hong Kong.

An entrepreneur is someone who has a great, innovative idea that identifies the need for the creation of a new business, taking on the financial risk in the hope of profit and driving that business forward in a measured way. This book draws on the stories, experiences and words of iconic business figures from around the globe and across the years - from Andrew Carnegie and Oprah Winfrey to Steve Jobs and Sunil Mittal. Each chapter deals with a specific aspect of entrepreneurship and the lessons they can teach us, such as: - If you want to become big, you need to think big. If you're content for your business to tick over, that's fine. But if you want it to be a world-beater, you need a world-beater's mindset. - Don't forget what makes your business scalable in the first place. - Prepare your company for growing pains. Expansion brings inevitable problems but an entrepreneur should do everything possible to ready their business. - Try to predict what lies ahead - but remember Warren Buffet's wise words: 'Forecasts usually tell us more of the forecaster than of the future'. Each study includes quotations from and about its main subject, along with words of wisdom from other relevant famous names. Informative, educative and thought provoking, *How to Think Like an Entrepreneur* presents the ideas and methods of the business greats, allowing the reader to expand their understanding of what drives and informs successful entrepreneurship.

How has the position of Afrikaners changed since the end of the Apartheid regime in South Africa? While the links between Afrikaner nationalist identity and the apartheid regime have been irrevocably altered, it is evident that this newly disempowered minority still commands a vast material and cultural capital. Certain Afrikaans speakers have become important players in the new South Africa and on the world stage. Davias argues that the global political economy and the closely associated ideology of globalization are major catalysts for change in Afrikaner identifications and positions. She identifies multiple Afrikaner constituencies

and identities and shows how they play out in the complex social, economic and political landscape of South Africa. Accessible, informative and well-written, "Afrikaners in the New South Africa" is a vital contribution to our understanding of post-apartheid South Africa. It will be indispensable for those interested in South Africa, identity politics, globalization, international political economy and geography.

The Oxford Handbook of American Drama

Walter Clyde Curry, a well-known student of Milton, analyzes the origins and unique construction of the grand stage upon which Milton presents the drama of human destiny in

Paradise Lost. Through close examination of four entities—Heaven of Heavens, Hell, chaos, and the World—a greatly expanded view is provided of the poet's concept of space and God's relation to total creation. In facing structural and philosophical problems Milton is shown to be neither a materialist, nor an eclectic, nor a pantheist, as many scholars have insisted; he emerges rather as a master syncretist of widely divergent materials and as a devout theopantist. Curry has established a firm basis for a better understanding of the poet's methodology and for a clearer insight into his artistic accomplishments
