The Health & Safety Handbook Charles C. Thomas Publisher

Non-technical skills are the cognitive and social skills that complement workers' technical skills. This book describes the basic non-technical skills and explains why they are important for safe and efficient performance in a range of high risk work settings from industry, health care, military and emergency services.

J. J. Keller's 5-Minute Workplace Safety Talks Gower Publishing Company, Limited

Many 21st century operations are characterised by teams of workers dealing with significant risks and complex technology, in competitive, commercially-driven environments. Informed managers in such sectors have realised the necessity of understanding the human dimension to their operations if they hope to improve production and safety performance. While organisational safety culture is a key determinant of workplace safety, it is also essential to focus on the non-technical skills of the system operators based at the 'sharp end' of the organisation. These skills are the cognitive and social skills required for efficient and safe operations, often termed Crew Resource Management (CRM) skills. In industries such as civil aviation, it has long been appreciated that the majority of accidents could have been prevented if better non-technical skills had been demonstrated by personnel operating and maintaining the system. As a result, the aviation industry has pioneered the development of CRM training. Many other organisations are now introducing non-technical skills training, most notably within the healthcare sector. Safety at the Sharp End is a general guide to the theory and practice of non-technical skills for safety. It covers the identification, training and evaluation of non-technical skills and has been written for use by individuals who are studying or training these skills on CRM and other safety or human factors courses. The material is also suitable for undergraduate and post-experience students studying human factors or industrial safety programmes.

STUDY GUIDE FOR Alive and Well at the End of the Day Teaching aid underscoring the principles of effective safety leadership The Second Edition of Alive and Well at the End of the Day provides industrial leaders in

operations with practical solutions to the tough safety leadership challenges they must manage. The book describes in detail the nature of those challenges (what makes them that tough) and offers proven best practices to successfully deal with them. The Study Guide is designed as a teaching aid for the Alive and Well book. Created by the highly experienced training specialists of Balmert Consulting, the Study Guide uses training best practices to help affix the concepts of Alive and Well in the minds of professional students. The use of strategically-crafted questions—both at the beginning and end of each review session—allows the student to work with the material conceptually, becoming more familiar and facile with it. Alive and Well is designed to teach front-line supervisors of workers in a wide range of industries how to help and guide their employees to understand the risks involved in the various aspects of their work, and how to cope with those risks and to plan and execute their jobs in ways that can help eliminate injuries. The topic of the Study Guide is the content of the book; its purpose is to help both supervisors and those reporting to them to more sharply focus on the principles in the book; to more fully understand and remember them; and to be able to apply them in everyday work situations.

No manager wants to see employees get hurt, but few are fully prepared to play meaningful roles in safety. The Manager's Guide to Workplace Safety is designed to provide managers with the relevant knowhow and proactive approaches to understand and take on safety management. With over 70 years of combined safety-training experience, authors R. Scott Stricoff and Donald R. Groover have worked with executives, managers, and supervisors from across the world to make significant advances in keeping people safe, engaged, and motivated in the workplace. Going beyond the generalities of typical safety resources, this book provides practical guidance on what an individual with management responsibility should do to support and drive safety excellence.

Safety at the Sharp End John Wiley & Sons

Written by world-renowned health and safety researcher E. Scott Geller, Working Safe: How to Help People Actively Care for Health and Safety, Second Edition presents science-based and practical approaches to improving attitudes and behavior for achieving an injury-free work environment. This book teaches proactive applications of behavior-based psychology for improving health and safety. Relevant theory and principles are clearly explained and practical step-by-step procedures are detailed. Dr. Geller's anecdotal and non-academic writing style makes the book fun and easy to read. This research-based text is completely updated and expanded from the 1996 edition. It includes three new chapters: one on behavioral safety analysis, another on intervening with supportive conversation, and the third on how to promote high performance teamwork. Thus, this second edition continues to provide the practical advice safety leaders rely on. Working Safe: How to Help People Actively Care for Health and Safety supplies the research and theory needed to customize effective behavior-based procedures and tools in your workplace. The information and examples provide health and safety professionals with behavioral science methods capable of enhancing safety awareness, reducing at-risk behavior, and facilitating ongoing participation in safety-related activities.

Elevated Work Platform Record of Training

Talking Safety summarises in a short user-friendly read the key element of safety leadership - the management and supervisor 'walk and talk'. Safety standards are set by a combination of three things: first, the basic systems: risk assessments, procedures, training, inductions and maintenance; second, the amount of objective learning about the inevitable weaknesses in these systems achieved from a 'Just Culture' perspective; and third, the quality of 'transformational' safety leadership which means coaching not telling, praising not criticising, leading by example and maximising front-line ownership and

involvement. A good 'walk and talk' is the only methodology that covers all of these issues and really should be embedded as 'part of the way we do things around here'. It is the centrepiece of any world class safety culture. Although covering all the key safety research findings by academics including Sidney Dekker, Andrew Hopkins and James Reason as well as latest influencing skills techniques from recent advances such as 'nudge' theory it is written in an accessible style using everyday examples and case studies. You can use any of the five simple steps it outlines to make a difference day to day. Employ its advice fully and it will help you embed safety thinking, transform your safety culture and make safety part of 'the way we do things around here'.
