This brief book, *DIY Divorce Without an Attorney*, provides an introduction, as well as fast access to, a popular online divorce service which has helped over 1.2 million people get divorced since the service first started in 2002. The divorce service is valid for all U.S. states and all Canadian provinces and territories. The divorce service costs \$159 with no additional fees or charges, and does not require you to engage an attorney, nor are you obliged to attend a courtroom hearing. The service is designed to be as stress-free as possible and is also a very fast divorce service. Couples have been known to get divorced using this service in as little as 24 hours, although 72 hours is more the norm. The only condition is that both parties must agree to the divorce; in other words, the divorce needs to be consensual. The process is very simple. You create an account, specify which state jurisdiction you are in and then download divorce papers for that particular jurisdiction. You complete a questionnaire and the paperwork. The process is very easy, but just in case there are doubts at any point along the way, there is a 24-hour telephone helpline.

Family justice requires not only a legal framework within which personal obligations are regulated over the life course, but also a justice system which can deliver legal information, advice and support at times of change of status or family stress, together with mechanisms for negotiation, dispute management and resolution, with adjudication as the last resort. The past few years have seen unparalleled turbulence in the way family justice systems function. These changes are associated with economic constraints in many countries, including England and Wales, where legal aid for private family matters has largely disappeared. But there is also a change in ideology in a number of jurisdictions, including Canada, towards what is sometimes called neo-liberalism, whereby the state seeks to reduce its area of activity while at the same time maintaining strong views on family values. Legal services may become fragmented and marketised, and the role of law and lawyers reduced, while self-help web based services expand. The contributors to this volume share their anxieties about the impact on the ability of individuals to achieve fair and informed resolution in family matters.

Those seeking social change confront the centrality of power on a daily basis. What precisely is power and how does it manifest itself? And how are radical and progressive strategies shaped by the ways in which we conceptualize it? Drawing on feminist, poststructuralist, and Marxist theory, Davina Cooper develops an innovative framework for understanding power relations in forms as diverse as reproductive technology, queer activism, municipal politics, and the regulation of lesbian reproduction. *Power in Struggle* explores the relationship

between power, sexuality, and the state and ultimately provides a radical re-thinking of these concepts and their interactions. Sexual politics, Cooper posits, must recognize the sexualization of everyday life and should not be exclusively the concern of a young, educated elite, nor should sex be shuttered as a private affair. Concluding with an important and original discussion of how an ethics of empowerment can inform political strategy, *Power in Struggle* is a must-read for activists, scholars, and lawyers interested in understanding the role of power in the state.

After the Act describes the aftermath of the recent removal under LASPO of public funding from legal services in family matters other than in defined cases such as child protection and domestic abuse. Through analysis of the policy context, interviews with key players, observation of services provided by lawyers, students, lay support workers and the advice sector, the authors outline the work being done and the skills being used in a range of settings. The book raises questions not only about access to family justice, but about the role of law in family matters in an increasingly post-legal society. Fragmentation of the market in the new services offering information, initial advice, online or alternative dispute resolution – but rarely ongoing casework – raises questions about where costs fall and how quality can be assured. Many of these services are forms of private ordering, where outcomes are hard to assess. If neither the state nor the individual can afford full legal services where the best interests of any child involved are of paramount importance, and lawyers negotiate to make best use of the resources available, perhaps it is time to consider using lawyers differently, with lay support, to solve problems before they become disputes.

Here is a new text that fulfills an emerging need in both higher and public education and stands to break new ground in addressing critical skills required of graduates. When working on their last book, *It Works for Me, Creatively*, the authors realized that the future belongs to the right-brained. While Daniel Pink and other visionaries may have oversimplified a bit, higher education is ripe for the creative campus, while secondary education is desperately seeking a complement to the growing assessment/teach-to-the-test mentality. You don't have to study the 2010 IBM survey of prominent American CEOs to know that the number one skill business wants is students who can think creatively. To meet the demand of new courses, programs, and curricula, the authors have developed a 200-page "textbook" suitable for secondary or higher education courses that are jumping on this bandwagon. *Introduction to Applied Creative Thinking*, as the title suggests, focuses not on just developing the skills necessary for creative thinking, but on having students apply those skills; after all, true creative thinking demands making something that is both novel and useful. Such a book may also be used successfully by professional developers in business and education. For this book, Hal Blythe and Charlie Sweet are joined in authorship by Rusty Carpenter. He not only directs Eastern Kentucky University's Noel Studio for Academic Creativity but has co-edited a book on that subject, *Higher Education, Emerging Technologies, and Community Partnerships* (2011) and the forthcoming *Cases on Higher Education Spaces* (2012). *Introduction to Applied Creative Thinking* is student-friendly. Every chapter is laced with exercises, assignments, summaries, and generative spaces. Order copies now or contact the publisher for further information.

In the spring of 1945, a young boy in the Pacific Northwest will make a life-or-death decision. Every morning, Herman "Hermy" Auerbach awakens to the pre-dawn song of canaries. The porch where he sleeps contains dozens of the songbirds. Outside, in the wider world, the Second World War enters its final, bloody months. Hermy comes to the Williams' house under protest after his parents' divorce, a result of his father leaving home initially to pursue his impossible dream of becoming an intelligence officer. Herman's mother, remarried to a sailor, abandons her son to move across the country and start another family with her new husband. By the time he takes up residency in the canary room, Hermy has already suffered both from abandonment and bullying. Life with the large, messy Williams clan offers Hermy little relief, although he bonds with the other boys in the family. When the boys hatch a wild escape plan, Hermy finds himself facing death, and deciding if his life is worth the struggle to survive after losing everything. A compelling story of one boy's struggle to survive the uncertainties of foster care and the war, *The Canary Room* brings to life the daily challenges of life on the US home front in vivid, historically accurate detail.

During my years of marital counseling as a pastor I have witnessed many couples that have decided to end their marriages after suffering a breakdown of the marital bond because of *The Emotional Divorce*. The question that I always ask is simple: how did you get to this place? How can two people who have shared so much of their lives together simply disconnect and disengage their love for one another? After listening to dozens of couples, including fellow pastors of failed marriages, I have identified the factors that contribute to their condition in this book. If you know your marriage is in trouble don't ignore the signs, this book was written to help you restore the continuity, compassion and communication in your marriage.

Maria Shriver, Kim Kardashian, Stevie Wonder, Britney Spears . . . Who do they have in common? Top LA divorce lawyer Laura Wasser.

If anyone ever had a platform to write a how to divorce book for today's generation, it's Laura Wasser. She has been practicing in her field for nearly twenty years, represented many of the country's top celebrities and has been celebrated for her unique style, her empathy and her expertise. Wasser's personal and professional life have been profiled by publications like the Los Angeles Times, Vogue and Interview. Most important, her approach and advice is different from almost any other and she articulates it in a simple manner. Laura Wasser addresses an entire generation who want—and need—to handle their breakups differently. It's no secret that the divorce rate in America is more than half the marriage rate. Yet the means for dissolving a relationship often seem hopelessly mired in an outdated perception of how it's supposed to be done. Wasser acknowledges that this generation's realities have evolved greatly since the previous generation's in almost every way, and that they want to get divorced cheaply and efficiently and maintain control of the process themselves. The daughter and partner of a prominent Los Angeles Family Law attorney, she has a deep history in the field, and she knows the available roads to uncontested resolution like nobody else. At times psychologist, at times strategist, and distinctly of this generation, Laura and her book will offer readers safer passage through what can be a devastating time, emotionally and financially.
