AVIAN DISEASE MANUAL, Pearson College Division

This fully revised edition provides a comprehensive discussion of how insights and concepts from new materialism and posthumanism might be used in investigating second language learning and teaching in classrooms. Alongside the sociocultural and poststructural perspectives discussed in the first edition, this new book presents insights from new materialism on identity, second language learning and pedagogical practices. This application of new theory deepens our understanding of how minority language background children learn English in the context of their classrooms. The author comprehensively explains the new materiality perspectives and suggests how research from this perspective might provide new insights on second language learning and teaching in classrooms. The book is unique in analysing empirical classroom data from a sociocultural, but also a new materiality perspective, and has the potential to change our understandings of research and pedagogical practices.

Medical and Veterinary Entomology John Wiley & Sons

This textbook concentrates mainly on the science involved in the raising of production animals, rather than the art of animal husbandry, which must involve thousands of hours of working directly with livestock for mastery. Fourteen chapters cover introductory animal reproduction, genetics, nutrition, breeds, animal health, and general management of various common livestock species. Coverage includes traditional large industries such as dairy cow, goat, beef, sheep, swine, poultry, and equine, and other less common species such as rabbit, camel, and ostrich. The included CD-ROM features study guide software with chapter summaries, vocabulary practice, and self-tests. Shapiro teaches preveterinary science at Los Angeles Pierce College and was a dairy farmer for nearly 20 years. Annotation copyrighted by Book News Inc., Portland, OR
