Multi-Agent Programming is an essential reference for anyone interested in the most up-to-date

developments in MAS programming. While

previous research has focused on the development of formal and informal

approaches to analyze and specify Multi-Agent

Systems, this book focuses

---

on the development of programming languages and tools which not only support MAS programming, but also implement key concepts of MAS in a unified framework. Part I describes approaches that rely on computational logic or process algebra – Jason, 3APL, IMPACT, and CLAIM/SyMPA. Part II presents languages and platforms that extend or are based on Java – JADE, Jadex and JACKTM. Part III provides two significant industry specific applications – The DEFACTO System for coordinating human-agent teams for disaster response, and the ARTIMIS rational dialogue agent technology. Also featured are seven appendices for quick reference and comparison.

Applied WPF 4 in Context sets the standard for leveraging the latest Windows user interface technology in your business applications. Using this book, you'll learn how to implement world-class Windows Professional Foundation (WPF) solutions in a real-world line of business applications, developing the code from the ground up, and understand how to apply best development practices and related .NET products and technologies to your solutions. You will cover designing and developing the application, testing and debugging, data access, reporting, and applying styles and themes to enhance the look of the user interface—all using WPF in a very practical, eminently useful context. You'll create asynchronous and parallel code, and learn how to distribute the application's components using Windows

---

Communication Foundation (WCF). You'll also apply the Model-View-ViewModel pattern, again in a real-world WPF application. Elegant and functional WPF applications are easier to create than ever before with Applied WPF 4 in Context.

The Leadership Partnership is volume two in the Museum Trustee Association's Templates for Trustees series. The book and customizable web-based templates feature tools that help boards to consider their options, identify their priorities, and plan their actions at this critical moment in a museum's life cycle. In addition to the manual and on-line website, purchasers have access to the ongoing assistance of MTA staff. As nonprofit management becomes more challenging, thinking about the relationship between the board and the director is evolving.

The bright line between the board's responsibility for policy and the staff's responsibility for management is blurring.

The Leadership Partnership explores and supports this critical partnership between the executive director and the board and helps leadership develop strategies and approaches appropriate for the individual institution. A series of online surveys allows board members to look at their own performance, that of the board as a whole and that of the executive director across ten critical areas of museum management: mission, vision and strategy; professional development, board operations, individual relationships, oversight, finances and fundraising,

---

collections, facilities, and public engagement. The final template guides users into turning the findings from the surveys into a leadership plan, to be presented and discussed with the board. *Beginners Guide to OpenOffice. that underpins the REACH risk assessments required for the use and placing on the market of chemicals in the European Union. A clear understanding of information provision and how this affects the assessment of chemical safety is fundamentally important to the success of policy on chemicals and ultimately to the sustainability of the chemicals industry. Within the book, the scientific processes that underpin the policy are explained in a practical way. Importantly, it includes coverage of techniques to help solve the problems of using potentially risky and hazardous chemicals through the use of less hazardous alternatives and 'green chemistry', and also the analysis of

the risks of the use of the most hazardous substances against the social and economic benefits of use. Chemical Risk Assessment: A Manual for REACH covers the following main themes: i) Assessment of chemical risk; ii) Risk management; iii) Hazard reduction, substitution and green chemistry; iv) Risk versus benefit – socio-economic analysis. The book acts as a practical guide and overview to chemicals risk assessment and risk management (in the EU context), as well as a support text for planning for the challenges of the future, which will see ever-increasing pressure to withdraw hazardous substances from the EU (and global) market, balanced against opportunities for

This volume contains the proceedings of the 11th KES International Conference on Sustainability and Energy in Buildings 2019 (SEB19) held in Budapest, 4th -5th July 2019 organised by KES International in partnership with Cardiff Metropolitan University, Wales, UK. SEB-19 invited contributions on a range of topics related to sustainable buildings and explored innovative themes regarding sustainable energy systems. The aim of the conference was to bring together researchers, and government and industry professionals to

discuss the future of energy in buildings, neighbourhoods and cities from a theoretical, practical, implementation and simulation perspective. The conference formed an exciting chance to present, interact, and learn about the latest research and practical developments on the subject. The conference attracted submissions from around the world. Submissions for the Full-Paper Track were subjected to a blind peer-review process. Only the best of these were selected for presentation at the conference and publication in these proceedings. It is intended that this volume provides a useful and informative snapshot of recent research developments in the
