Core Curriculum for Oncology Nursing Hardie Grant Publishing

From the duo behind the massively successful and award-winning podcast Stuff You Should Know comes an unexpected look at things you thought you knew. Josh Clark and Chuck Bryant started the podcast Stuff You Should Know back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making Stuff You Should Know one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless "whys" and "hows" from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they ' ve long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you ever wondered about the world around you, and wished to see the magic in everyday things? Come get curious with Stuff You Should Know. With Josh and Chuck as your guide, there ' s something interesting about everything (...except maybe jackhammers).

Appraisal and Evaluation in Central Government : Treasury Guidance OECD Publishing

"Advances in technology, research, and evidence-based practice have led to improvements in the care of patients receiving radiation therapy. The knowledge and expertise required by nurses must focus on the needs of patients who come into their care at any point across the trajectory of the cancer journey. Nurses may work with patients at varying stages of the radiation therapy process and in a wide range of settings. Regardless, however, the need to be knowledgeable about the symptoms and side effects associated with this treatment is essential for nurses caring for this patient population. The Oncology Nursing Society has published the fifth edition of Manual for Radiation Oncology Nursing Practice and Education to support nurses who care for patients who will receive, are receiving, or have received radiation therapy. The fifth edition features significant updates and changes to the content to reflect advances in technology, treatment options, and symptom management. New sections have been added based on input from radiation oncology nurses or as a result of changes in treatment options, the needs of specific patient populations, and observations from clinical practice. New topics include patients with cognitive changes and dementia; general distress and coping; patients with mental illness; special populations, such as women who are pregnant, adolescents, and young adults; special needs related to late effects of treatment and cardiac toxicities; and treatment modalities, including cobalt therapy and immunotherapy. This manual serves as an essential resource for individual nurses new to working in a radiation therapy setting as well as to nurses wanting to advance their knowledge in radiation biology and protection, diverse radiation therapy modalities, combination treatments, site- or disease-specific concerns, symptom management, special populations, and care during transition points. Additionally, this manual can be a resource to advanced practice clinicians, educators, and administrators, with a focus on support for nursing staff seeking the education and skills required to care for patients receiving radiation therapy and their families"--

International Convergence of Capital Measurement and Capital Standards John Wiley & Sons

Test your knowledge with 21 all-new case studies covering a diverse range of clinical topics involving chemotherapy and biotherapy. Each topic provides comprehensive questions and evidence-based rationale for answers. Topics range from combination therapy and dose calculations to targeted therapies, oral agents, infusion reactions, extravasation, toxicities, and more. Symptom management, ethical issues, and survivorship care planning are also explored.

Putting Evidence Into Practice a Pocket Guide to Cancer Symptom Management Elsevier Health Sciences

From the team that has brought you the Putting Evidence Into Practice (PEP) resources since 2006 comes the first ever pocket-sized book containing everything you need to immediately improve patient care. Featuring the latest evidence on 19 symptom management topics, this book provides a quick reference guide to help clinicians identify which interventions have demonstrated effectiveness against the following symptoms and side effects: Anorexia Anxiety Caregiver strain and burden Chemotherapy-induced nausea and vomiting Cognitive impairment Constipation

Depression Diarrhea (chemotherapy- and radiation-induced) Dyspnea Fatigue Hot flashes Lymphedema Mucositis Pain (acute, breakthrough, chronic, and refractory/intractable) Peripheral neuropathy Prevention of infection (general and transplant) Radiodermatitis Skin reactions Sleep-wake disturbances This is an essential tool for ensuring quality care of patients with cancer and was designed for easy carrying and referencing during direct patient care. Each chapter outlines the nature, incidence, and impact of the symptom for patients with cancer; factors that create the highest risk; key aspects of assessment and identification of some assessment tools; intervention evidence; and suggestions for application in practice. Get the most current evidence-based information on common cancer symptoms and treatment side effects in this new, easy-to-carry guide.

BMTCN Certification Review Manual National Academies Press

The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

Access Device Guidelines Elsevier

The BMTCN Certification Review Manual is an essential resource for RNs preparing to take the blood and marrow transplant certified nurse (BMTCN) examination. As the only nationally accredited test of its kind, the BMTCN certification identifies nurses as being adept in the specialty of blood and marrow transplantation. This study manual is an essential learning resource for your certification preparation.

Mometrix Media LLC

Published in collaboration with the ONS, this text is the definitive source for concepts and practices in oncology nursing and can be used for orientation of nurses to oncology, inservice and continuing education programs for practicing nurses, a basis for curriculum development in graduate programs, and as a review tool for certification. Based on the blueprint of the certification examination by the ONCC (Oncology Nursing Certification Corporation), the book is in outline format to help readers focus on the most important information. Instructor resources available; contact your sales representative for details. Covers the entire scope of the specialty ensuring comprehensive coverage Outline format helps the reader focus on the most important information Effective guide for teaching and learning for in-service, continuing education, and academic programs Powerful study tool for the ONCC certification exam Tables and figures illustrate complex concepts * Entirely revised, updated, and expanded to reflect the current state of oncology nursing practice. * Expanded pain management content. * New content on nonpharmacologic interventions (e.g. heat massage, imagery). * New content on alternative therapies.

Study Guide for the Core Curriculum for Oncology Nursing National Academies Press

These Guidelines represent the first attempt to provide international recommendations on collecting, publishing, and analysing subjective well-being data.

Nursing Professional Development for Clinical Educators Palgrave Macmillan

Areas covered include productivity analysis within various sectors and at firm level as well as measures of labour and capital inputs.

Lies and Falsehoods

Chemotherapy and Immunotherapy Guidelines and Recommendations for Practice

Chemotherapy and Immunotherapy Guidelines and Recommendations for Practice features 26 chapters examining multiple categories of cancer-care agents, including chemotherapy, immunotherapy, molecularly targeted agents, and hormone therapy.

Access Device Standards of Practice for Oncology Nursing

Access Device Standards of Practice for Oncology Nursing reviews the controversies in access device care, explores the range of devices currently available, details the advantages and disadvantages of each device to ensure optimal selection based on patient needs, and discusses the key legal ramifications concerning access devices and their management.

Clinical Practice Guidelines We Can Trust

Published in collaboration with the ONS, this Study Guide is a must-have for those who are taking the certification exam. The chapters parallel those presented in the Core Curriculum for Oncology Nursing, 4e. The number of questions in each chapter will correspond with the percentage of questions on that particular topic included in the certification exam. Answers and rationales for correct and incorrect responses are listed at the end of each chapter. The book also includes an updated bibliography for each subject.
