This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles.

She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated

with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders.

Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

No matter how you try to hide it, the truth will always come out . . . When a small plane crash ends with a group of seven teens washed up on a deserted island, their first thought is survival. With supplies dwindling and the fear of being stranded forever becoming more of a reality, they quickly discover that being the most popular kid in high school doesn't help when you're fighting to stay alive. And when strange and terrifying accidents start to occur all around them, the group realizes that they are being targeted by someone who was on the plane, and that the island isn't their only danger. A terrible secret from a party the night before the flight has followed them ashore—and it's clear that someone is looking for justice. Now survival depends on facing the truth about that party: who was hurt that night, and who let it happen? Marie and her mother, Allie, who was pregnant with Rose, were deserted by Marie's father when Marie was two years old. Allie was left with no food or money to pay bills, so she had to write to her papa, Cassie, for help. He went to Ada, Oklahoma, and took them back to Twin Acres, a 600-acre farm in Arkansas. The farm was so named because it was owned by Cassie and his twin brother, Willie. It was a successful farm and a wonderful place to grow up. Then came the Crash of '29 - there was no money, but there was food and a place to live. Still struggling with the Great Depression, our country entered WWII. The Army decided Twin Acres was to be a chicken farm to help feed soldiers at a nearby base. Eventually they also claimed Mal, Marie's new husband, and sent him to North Africa as a medic, where he was captured by the Germans. Mal Jr. grew up to follow Grandfather Cassie's footsteps on the farm, as did his son. Twin Acres flourished with each generation, but when Marie and her sister, Rosie, were both widowed they made some drastic life changes.
