This book touches briefly on my youngest

brothers' life growing up, and how we lost track of each other numerous times but always seemed to re-unite. The love we had for each other was fully tested during a period in his life where he was finally growing up and taking responsibility on. Tragic circumstances derailed his life, and because of a critical lapse in judgment on night, the lives of many were permanently changed forever. He tried to deal with the death of his girlfriend who died after an accident they had on his motorcycle, but after six weeks he gave up and lost the battle and took his own life. This book is about a gut wrenching, knock down, no punches pulled fight to keep him alive, because I saw in his eyes that he no longer wanted to live with the pain from his actions. Two totally different families were involved in this tragedy, which took two young lives, and things sometimes got

out of control. This book will take you on a mental ride that I would not wish on anyone. Trying to justify his suicide was impossible, but I tried. The human mind can withstand an enormous amount of pain, I found that out. It also has a breaking point, and my brother found that out as well. The aftermath of suicide especially for a loved one, is sometimes unbearable, but you have to go on. This book deals with his love, his life, the accident scene, the hospital, legal situations, his suicide, the funeral, and how some of the members of both families, were affected. I have come through this ordeal mentally intact, but I still live with the thought "could I have stopped my brother from taking his life"? I am afraid to answer that.

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has

taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around

the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.
