"This pioneering study of
United States direct investment
in Japan will interest academic
specialists, business managers,
and government policymakers in
America, Japan, and elsewhere.
Drawing on rich historical
materials from both sides of
the Pacific, including
corporate records and
government documents never
before made public, Mason
examines the development of
both Japanese policy towards
foreign investment and the

strategic responses of American
corporations. This history is
related in part through original
case studies of Coca-Cola, Dow
Chemical, Ford, General Motors,
International Business Machines,
Motorola, Otis Elevator, Texas
Instruments, Western Electric,
and Victor Talking Machine. The
book seeks to explain why so
little foreign direct investment
has entered modern Japan. In
contrast to the widely held view
that emphasizes an alleged lack
of effort on the part of foreign
corporations, this study finds
that Japanese restrictions merit
greater attention. Many analysts
of the modern Japanese political

economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy."
