This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing

shift from a "woman's car" to "going green" is discussed.

Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

*Vauxhall/Opel Corsa Service and Repair Manual* e-artnow sro Simple, subtle, and drolly funny, the Pumphrey brothers' newest picture book is a layered exploration of the foolishness of making assumptions and the virtue of curiosity. When four swamp creatures looking to cross a river come upon a log

that would allow for precisely that, they can't believe their luck. But a questionable tail adjacent to that log gives them second thoughts. Opossum believes it's a sneaky tail and that they must pass it quietly. Squirrel thinks it's a scary tail that can be cowed by intimidation. Rabbit decides it's a mean tail that deserves a taste of its own medicine. As the critters exhaust approaches one by one, Mouse, the smallest of

the lot, observes their folly and adjusts accordingly. But is it the mouse or the tail that will defy expectations? Pairing their iconic illustration style with a wry irreverence, the Pumphrey brothers have crafted a delightful tale that reminds us to think before we act. **Pace** e-artnow sro "This pioneering study of United States direct investment in Japan will interest academic specialists,

Volume One traces the history of Opel and

Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and

Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never

---

offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM. Lodusky Springer

The author buys a long-dead vintage BMW sight-unseen, travels a thousand miles to where it sits, gets it running, and drives it home. During the twelve-day trip, he finds that what began as a story of man-versus-machine turns into something else entirely--a story of the kindness of strangers, and how doors sometimes open

exactly when you need them to. "Rob Siegel is a writer with the mind of a mechanic and a mechanic with the mind of a writer. He's also an old-school romantic of the best kind, and one of the few people who understands what car culture really means to the people invested in it-free of stereotype, cliché, or pat sentiments you've read a thousand times before. Like all of his writing, *Ran When Parked* focuses heavily on the why behind the hobby. It's a mix of

casual, long-form blog entry; detailed how-to; and emotive confessional; most of all, he seems to believe the world would be a better place if everyone else followed on his crazy path and devoted their free time to resurrecting old iron. He's right." -Sam Smith Editor at Large, *Road & Track*
