Following the Pulitzer prize-winning collection *Stag's Leap*, Sharon Olds gives us a stunning book of odes. Opening with the powerful and tender "Ode to the Hymen," Olds addresses and embodies, in this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its structures and pleasures. The poems extend parts of her narrative as a

daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. In such poems as "Ode to My Sister," "Ode of Broken Loyalty," "Ode to My Whiteness," "Blow Job Ode," and "Ode to the Last Thirty-Eight Trees in New York City Visible from This Window," Olds treats us to an intimate examination that, like all her work, is universal, by turns searing and charming in its honesty. From the bodily joys and sorrows of childhood to the deaths of those dearest to us, Olds shapes the world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

cancers of the head  
and neck (SCCHN),  
also known as head  
and neck cancers  
(HNC) encompass  
malignancies of the  
oral cavity,  
larynx, nasopharynx  
and pharynx, and  
are diagnosed in  
over 500,000  
patients worldwide  
each year,  
accounting for 5%  
of all  
malignancies. In  
the past several  
years, there have  
been significant  
developments in  
understanding of  
HNC. It is now  
recognized that  
although alcohol  
and tobacco use has  
represented the  
likely predominant  
cause of SCCHN, the  
incidence of a  
second class of  
SCCHN related to  
oncogenic human  
papillomavirus  
(HPV) infection is  
increasing, with a  
four-fold increase

in the past 2  
decades, and now  
thought to  
represent up to 30%  
of cases. The first  
effective target  
for SCCHN, the EGFR-  
targeting antibody  
cetuximab, was  
approved as  
recently as in  
2006; since then, a  
growing body of  
research has  
identified  
additional  
signaling pathways  
as important in  
disease  
pathogenesis, and  
in resistance to  
treatment. Proteins  
such as c-Met, Src,  
and HER2 are  
emerging as new  
therapeutic  
targets, with a  
considerable  
ferment in the  
clinical trial  
community. As a  
capstone of  
research progress,  
2011 marked the  
first reports of  
high throughput  
sequencing of SCCHN  
tumors, with these  
efforts identifying  
unexpected players  
such as Notch as  
frequent subject of

mutation, spawning  
new hypotheses for  
future research.  
This book will be  
of interest to  
researchers who are  
interested in  
better  
understanding the  
biology of head and  
neck cancers, with  
the goals of better  
designing

cross-cultural focus,  
cutting-edge  
consideration of the  
interrelationships  
between heredity and

examples, and long-  
standing commitment to  
presenting the most up-  
to-date scholarship.  
This new edition  
continues to offer  
students research-  
based practical  
applications that they  
can relate to their  
personal and  
professional lives.  
Laura Berk, renowned  
professor and  
researcher, has  
revised the text with  
new pedagogy, a  
heightened emphasis on  
the interplay between  
heredity and  
environment, and an  
enhanced focus on many  
social policy issues,  
while emphasizing the  
lifespan perspective  
throughout. The latest  
theories and findings  
in the field are made  
accessible to students  
in a manageable and  
relevant way. Berk's

signature storytelling  
style invites students  
to actively learn  
beside the text's  
"characters." Students  
are provided with an  
especially clear and  
coherent understanding  
of the sequence and  
underlying processes of  
human development,  
emphasizing the  
interrelatedness of all  
domains—physical,  
cognitive, emotional,  
social—throughout the  
text narrative and in  
special features. Berk  
also helps students  
connect their learning  
to their personal and  
professional areas of  
interest. Her voice  
comes through when  
speaking directly about  
issues students will  
face in their future  
pursuits as parents,  
educators, health care  
providers, social  
workers, and  
researchers. As members  
of a global and diverse  
human community,  
students are called to  
intelligently approach  
the responsibility of  
understanding and  
responding to the needs  
and concerns of both  
young and old. While  
carefully considering  
the complexities of  
human development, Berk  
presents classic and  
emerging theories in an  
especially clear,  
engaging writing style,  
with a multitude of

research-based, real-

examples. Strengthening  
the connections among  
developmental domains  
and of theory and  
research with
