Don't Shoot Yourself in the Foot Before You Even Open Your Mouth! The Writing Guide for Professional Speakers. Do you want to become a professional public speaker, someone who gets paid to speak in public about topics you are passionate about? If so, I've got good news and bad news. The bad news is that it's a crowded ole world out there-every Tom, Dick, and Harriet seem to be a "professional" speaker, armed with a book, a blog, and a boatload of subject-matter expertise. The good news is that only a few of these "professionals" can spell or even construct a correct sentence in American English. Look around! If you want to stand out, if you want to impress potential hosts, if you want to get hired again and again, then you have to recognize that your written words will probably be read before your spoken words

are heard. In other words, your written words have to be flawless. In *Before You Even Open Your Mouth*, nine-time, award-winning author and public speaker Liz Courson shares her expertise about how to write to impress. Liz speaks professionally 80-100 times each year, and part of her success, she believes, is the attention to detail she brings to every aspect of her speaking, including her promotional materials. "Punctuation and grammar is easy, and it's fun," she says. "And, since our writing is part of how people judge us, it's important for every professional speaker to know how to write well."

The essays in *Web Writing* respond to contemporary debates over the proper role of the Internet in higher education, steering a middle course between polarized attitudes that often dominate the conversation. The authors argue for the wise integration of web tools into what the liberal arts does best: writing across the curriculum. All academic disciplines value clear and compelling prose, whether that prose comes in the shape of a persuasive essay, scientific report, or creative expression. The act of

writing visually demonstrates how we think in original and critical ways and in ways that are deeper than those that can be taught or assessed by a computer.

Furthermore, learning to write well requires engaged readers who encourage and challenge us to revise our muddled first drafts and craft more distinctive and informed points of view. Indeed, a new generation of web-based tools for authoring, annotating, editing, and publishing can dramatically enrich the writing process, but doing so requires liberal arts educators to rethink why and how we teach this skill, and to question those who blindly call for embracing or rejecting technology.
