The technology adoption on the information highway is supersonic.

Digital is perhaps at the crux of this metamorphosis as Digital Transformative best practices hold the centrestage in

this decade.

Understanding the Digital best practices and strategies would not only open the doors to a number of opportunities but also help understand as to how do we integrate, synergise, blend all the mixes in this concoction in the right proportion along with other factors in order to achieve the best deliverables. This book not only talks of Digital marketing but many of its advanced versions and

combinations, that we see soon in the impending decade, albeit in different versions.

Whether you are an Individual, entrepreneur, media marketer, brand marketer or a student, this book will help you build your brand. You could Scale your business regionally, nationally and globally. What's even interesting is that you choose your audience, you choose the genre and You could also generate volumes of

customers, converse with them, educate them about your product and engage them like never before. So let's do this journey together and see where does all this head to? There are plenty of examples that I have cited to understand and comprehend the Digital Transformative practices better. It answers questions such as: Imagine what the Digital world would look like ten years down the lane? What call for a great

Digital Marketing strategy? The Role of Data and how it is going to evolve? Would artificial intelligence change digital dynamics? Would it eliminate jobs? What's the secret and underlying principles to building a great digital business? How deep-seated is Virtual Reality going to become? The role of chatbots in the times to come?

There are a number of marvelous books that address the topic of the case method. If you are interested in facilitating cases, you can look to the classic book *Teaching and the Case Method* by Louis Barnes, C. Roland Christensen and Abby Hansen (1994). The collection of essays on the subject, *Education for Judgment: The Artistry of Discussion Leadership* by C. Roland Christensen, David

Garvin and Ann Sweet (1991) is a wonderful and inspiring read as well. If your interest is case-based research, it would be nearly impossible to find a more authoritative source than Robert Yin's (2009, 4th Edition) *Case Study Research: Design and Methods*, which (at last count) has been cited nearly 29,000 times, according to Google Scholar. There is even a new entry to the field, William Ellet's (2007) *The Case Study Handbook: How to Read, Discuss, and Write Persuasively about Cases* that is specifically aimed at the student. At first glance, then, the topic of case studies in education

and research seems clear as I identify the happens, I am also to be pretty well three areas of focus the only course in covered. Do we for this book. Why 11 case discussions for me is their this is a problem (a 12 week tendency to focus should become semester). As it on isolated topics.

Specifically, case facilitation, case writing and case research are treated as separable activities. I would argue that these three aspects of the case method—which I define quite broadly—are inseparable. For institutions that wish to achieve the full set of benefits provided by the case method, all three activities must be pursued in parallel. Perhaps this is why so few institutions have achieved success through the case method. In this book, I will argue that achieving such integration is precisely why those rare institutions have been so successful. Once you start believing

that the case method can be a key to institutional success, how you get there becomes a real challenge. At leading institutions featuring the case method, such as HBS, the philosophy is largely learned through a period of apprenticeship. For example, I did not encounter any of the references mentioned in the first paragraph—excepting Yin—at any time during my 5 year doctorate at HBS. Instead, I went out and wrote cases, facilitated discussions and did research under the guidance of faculty members who were masters of the craft. How can someone without the benefit of such an

experience acquire such mastery? While I cannot offer any promises in this regard, I will at least provide some examples and easy-to-follow checklists that may be of service to individuals getting started.
