Community-Led Practices to Build the Worlds We Need

“One of the most interesting and useful books ever written on networking.”—Adam Grant
Social Chemistry will utterly transform the way you think about “networking.”
Understanding the contours of your social network can dramatically enhance personal relationships, work life, and even your global impact. Are you an Expansionist, a Broker, or a Convener? The answer matters more than you think. . . .
Yale professor Marissa King shows how anyone can build more meaningful and productive relationships based on insights from

neuroscience, psychology, and network analytics. Conventional wisdom says it's the size of your network that matters, but social science research has proven there is more to it. King explains that the quality and structure of our relationships has the greatest impact on our personal and professional lives. As she illustrates, there are three basic types of networks, so readers can see the role they are already playing: Expansionist, Broker, or Convener. This network decoder enables readers to own their network style and modify it for better alignment with their life plans and values. High-quality connections in your social network strongly predict

cognitive functioning, emotional resilience, and satisfaction at work. A well-structured network is likely to boost the quality of your ideas, as well as your pay. Beyond the office, social connections are the lifeblood of our health and happiness. The compiled results from dozens of previous studies found that our social relationships have an effect on our likelihood of dying prematurely—equivalent to obesity or smoking. Rich stories of Expansionists like Vernon Jordan, Brokers like Yo-Yo Ma, and Conveners like Anna Wintour, as well as personal experiences from King's own world of connections, inform this warm, engaging, revelatory

investigation into some of the most consequential decisions we can make about the trajectory of our lives. *What Is Lightbody?* John Wiley & Sons *Know Your Soul: Bring Joy to Your Life* – Is a thought provoking, heartwarming book that not only describes the origin, purpose and structure of the Soul, but provides instruction for connecting to Your Soul. In addition, the authors delightfully describe personal experiences and interactions they have had with their Higher Self and Soul. Based on inspiration from our guides and the loving direction of Archangel Michael; rarely disclosed or understood information is freely

revealed. This is a book you will refer to often. The Power of Introverts in a World That Can't Stop Talking Independently Published Concurrency can be notoriously difficult to get right, but fortunately, the Go open source programming language makes working with concurrency tractable and even easy. If you're a developer familiar with Go, this practical book demonstrates best practices and patterns to

help you incorporate concurrency into your systems. Author Katherine Cox-Buday takes you step-by-step through the process. You'll understand how Go chooses to model concurrency, what issues arise from this model, and how you can compose primitives within this model to solve problems. Learn the skills and tooling you need to confidently write and implement concurrent systems of any size. Understand

how Go addresses fundamental problems that make concurrency difficult to do correctly. Learn the key differences between concurrency and parallelism. Dig into the syntax of Go's memory synchronization primitives. Form patterns with these primitives to write maintainable concurrent code. Compose patterns into a series of practices that enable you to write large, distributed systems that
