An easy, learn-by-doing introduction to hotel front office operations Hotel Front Office Simulation: A Workbook and Software Package offers a direct, experience-based approach to learning hotel front office operations. An extremely practical and easy-to-use learning tool, it works equally well on its own or in conjunction with virtually any front office operations or hotel management textbook. As an invaluable source of virtual on-the-job training, it is an outstanding resource to help prepare students to meet the fast-paced challenges of a hotel front office. How It Works The workbook and software move step by step through each part of the guest cycle, from the reservation process to the night audit. Exercises at the end of each workbook chapter help students apply and reinforce what they've learned. The CD-ROM and data disk feature front office simulation software adapted from INNSTAR, the hotel property management system used by hundreds of hotels. The software features a 25-room virtual hotel that helps users practice and hone their front office skills in a remarkably true-to-life setting. What It Covers * Taking, changing, and canceling reservations (for individuals and groups) * Checking in/registering walk-ins and guests with reservations * Handling posting and folio management * Performing tasks that involve housekeeping, maintenance, and other departments * Running a full night audit and reading the reports

Please note: This is a companion version & not the original book. Sample Book Insights: #1 In 1996, the first article on Internet-based training was published in Training Magazine. That year, the e-learning market grew from a few million dollars to \$3.4 billion worldwide. But in 2002, the stock market crashed, and the e-learning industry experienced a trough of disillusionment. #2 The last event in the time flow is the merger in the e-learning industry between SmartForce and SkillSoft in 2002. This merger created the largest global e-learning vendor, and it is viewed by CLO magazine as the beginning of the trend toward Enlightenment and Productivity. #3 Today, e-learning has proved itself to be a credible opportunity and approach to learning, though it has been hurt by some less-than-stellar implementations. Many

believe that there is no doubt about the importance of applying e-learning when and where it adds value. #4 E-learning has proven to have a significant business impact, as you will find in Chapter 2 of this Fieldbook. Many organizations have successfully implemented e-learning initiatives that were well aligned with specific business goals.

This book very specifically focuses on technology application in tourism in Asia. The book contains twenty-seven chapters in four sections (i.e., theories, innovations, practices, and future research directions), based on the intriguing qualities and importance of technology applications in the Asian tourism business. This book, a blend of comprehensive and extensive efforts by the contributors and editor, is designed to extensively cover technology applications in tourism in Asia, including distinct topics such as mobile computing, new product designs, innovative technology usages in tourism promotion, technology-driven sustainable tourism development, location-based apps, mobility, accessibility, the post crisis situation of COVID-19, etc. This book is a significant contribution towards the very limited knowledge of technology applications in tourism, with selected examples of Asian countries. The importance of technology in Asian tourism is rapidly increasing, and has led to a rise in luxury, allowing citizens to enjoy leisure travel over both long and short distances. The rise of low-cost airlines and the region's growing, affluent middle class have changed the tourism environment dramatically. More tourists are booking their holidays online as a result of technological advancements. Online travel is the most important and well-established aspect of Asia's Internet economy. Considering the ongoing trend of technology applications in the tourism industry in Asia, more research attempts like this book need to be made aiming towards exploring diverse aspects. As tourism is an expanding area, this book can serve as a reading companion for tourism students, policy planners and industry professionals. This book is expected to be appreciated by expatriate researchers and researchers having a keen interest in the Asian tourism industry.

Find out how accurate forecasting and analysis can prevent costly mistakes! Management Science Applications in Tourism and Hospitality examines innovative tools for evaluating performance and productivity in tourism offices, hotels, and restaurants. This collection of recent studies focuses on two important topics of management science: forecasting and a relatively new analytical methodology called data envelopment analysis (DEA). This book will show you how tourism forecasting accuracy can be enhanced and how DEA can be used to benchmark productivity and improve advertisement efficiency. Management Science Applications in Tourism and Hospitality provides you with a useful blend of analysis from both theory and real-data perspectives. This book uses case studies, application techniques, and expert advice to review various productivity measurement methods and compare them to DEA, revealing DEA's strengths, weaknesses, and its potential in the operating environment. With Management Science Applications in Tourism and Hospitality, you'll be able to: utilize destination benchmarking perform multiunit restaurant productivity assessments using DEA conduct hotel labor productivity assessments using DEA measure and benchmark productivity in the hotel sector using DEA model tourism demand use an improved extrapolative hotel room occupancy rate forecasting technique forecast short-term planning and management for a casino buffet restaurant apply city perception analysis (CPA) for destination positioning decisions This book is generously enhanced with tables and figures to substantiate the research. Management Science Applications in Tourism and Hospitality is valuable for hospitality and tourism educators and graduate students learning and doing research in operation analysis. Savvy executives and professionals who want to improve efficiency in their industry will also benefit from the techniques illustrated in this timely guide.

Develop a library staff training program that really works! To stay on top of the lightning-fast changes in the library field and provide your patrons with the best service possible, you need to establish and sustain an effective program for training your staff. The Practical Library Trainer examines the concept of the library as a learning place for patrons and staff, offering a comprehensive view of training from an administrator's perspective. Bruce E. Massis, author of *The Practical Library Manager* (Haworth), addresses the essential issues of how to develop a strong program of continuous instruction, including customer service, reporting, recruitment, and retention of staff. The book focuses on the integration of staff training as a blended activity instead of an intervention, quelling the notion of training as an add-on to existing staff duties. The current information-rich environment provides your patrons with an abundance of resources to choose from for their research needs. But they can't do it alone—they need direction from a knowledgeable librarian who can recognize the pedigree, currency, and validity of licensed resources, particularly those available through electronic means. The Practical Library Trainer uses the goal of long-range customer service as a starting point, emphasizing the return on investment possibilities from blended training methods as a key to meeting your patrons' high expectations of service. The book also provides examples from outside the library community to demonstrate the importance of training on a non-library setting and looks at future training issues. The Practical Library Trainer examines: types of staff training (formal, informal, employer-provided, qualifying, skill

improvement) strategies for recruiting and retaining a staff
