14 Best Examples Of Operant Conditioning - RankRed

Operant conditioning is an approach to learning that occurs through reward and punishment by creating a connection between a specific behavior and a consequence for that behavior. Skinner utilized the term ' operant ' to refer specifically to an " active behavior that operates upon the environment to generate consequences " (McLeod, 2007, ¶ 4).

Operant Conditioning as a Result of Students' Behavior ...

Various types of fines, such as speeding tickets or littering fines, are often presented as examples of the operant conditioning process. If you get fined for driving over the speed limit, that would be the case of the negative punishment, where something is taken away from you after a behavior. The government takes a specific amount as a penalty with the apparent intent of reducing speeding ...

What Is Operant Conditioning? Definition and Examples

Operant conditioning tries to negate the belief that internal thoughts and mere motivations would bring about learning a behavior. As a behaviorist, Skinner thought

that only external causes of behavior should be considered. The term "operant" was used by Skinner in order to give us a good overview of his theory. By this term, he meant that this type of conditioning involves only external ...

[Operant Conditioning Paper Sample](#)

Operant conditioning is a sort of learning where behavior is ruled by the outcome. It is a process where an individual learns to repeat behaviors for a positive outcome or to avoid a negative outcome. B.F. Skinner (1904-1920) was a psychologist and he developed the theory of operant conditioning.

[Operant Conditioning Essay | Bartleby](#)

Operant conditioning is a learning theory that was postulated by Burrhus Frederic Skinner and it states that learning takes place through rewards and punishments for certain behavior. In other words, through operant conditioning, a correlation between particular conduct and the consequences of this kind of conduct is built (Coon & Mitterer, 2008).

[Sample Psychology Paper on Operant Conditioning](#)

Operant conditioning is based on a skinner box, which observes the behavior of animals. It is a special cage which is sound proof and contains a rat. The cage is also built in such a way that it has a pedal or bar on one of the sides, which when pressed, makes food pellets to be released (Weiss, 2005).

To study operant conditioning, Skinner conducted experiments using a "Skinner Box," a small box that had a lever at one end that would provide food or water when pressed. An animal, like a pigeon or rat, was placed in the box where it was free to move around. Eventually the animal would press the lever and be rewarded. Skinner found that this process resulted in the animal pressing the ...
