[Commerce and Management Practice Sets](#) John Wiley & Sons Tuberculosis remains a major health crisis in the world, particularly among the poorest and most vulnerable populations. In an effort to staunch the spread of TB, the World Health Organization set goals to detect TB cases at a rate of 70 percent and to cure patients at a rate of 85 percent by 2005. The primary strategy was to use the Directly Observed Treatment Short Course (DOTS) strategy. The Philippines achieved these goals. Catholic Relief Services chose the Philippines to study how the DOTS strategy can be further strengthened, particularly by identifying and closing any gender gaps in the diagnosis and treatment of women. The study uncovered key disparities in TB services for men and women, providing the basis for recommendations to design TB health programs that are more sensitive to gender and culture.

The objective of this book is to provide a valuable compendium of problems as a reference for undergraduate and graduate students,

faculty, researchers and practitioners of operations research and management science. These problems can serve as a basis for the development or study of assignments and exams. Also, they can be useful as a guide for the first stage of the model formulation, i.e. the definition of a problem. The book is divided into 11 chapters that address the following topics: Linear programming, integer programming, non linear programming, network modeling, inventory theory, queue theory, tree decision, game theory, dynamic programming and markov processes. Readers are going to find a considerable number of statements of operations research applications for management decision-making. The solutions of these problems are provided in a concise way although all topics start with a more developed resolution. The proposed problems are based on the research experience of the authors in real-world companies so much as on the teaching experience of the authors in order to develop exam problems for industrial engineering and business administration studies.
