PC Mag Springer Nature  
Lemon-Aid Used Cars and Trucks  
20102011 shows buyers how to  
pick the cheapest and most reliable  
vehicles from the past 30 years of  
production. This book offers an  
exposf gas consumption lies, a do-  
it-yourself service manual, an  
archive of service bulletins granting  
free repairs, and more.  
PC Mag  
Volume One traces the history  
of Opel and Vauxhall separately  
from inception through to the  
1970s and thereafter collectively  
to 2015. Special attention is  
devoted to examining  
innovative engineering features  
and the role Opel has taken of  
providing global platforms for  
GM. Each model is examined  
individually and supplemented  
by exhaustive supporting  
specification tables. The  
fascinating history of Saab and  
Lotus begins with their humble  
beginnings and examines each  
model in detail and looks at why  
these unusual marques came

under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

**Automotive News**  
 This book discusses the recent advances in combustion strategies and engine technologies, with specific reference to the automotive sector. Chapters discuss the advanced combustion technologies, such as gasoline direct ignition (GDI), spark assisted compression ignition (SACI), gasoline compression ignition (GCI), etc., which are the future of the automotive sector. Emphasis is given to technologies which have the potential for utilization of alternative fuels as well as emission reduction. One special section includes a few chapters for methanol utilization in two-wheelers and four wheelers. The book will serve as a valuable resource for academic researchers and professional automotive engineers alike.
