In addition, all privileged application users (database users) would need to be assigned as valid schemas to the workspace, otherwise the above procedure would prevent switching to that database user. The customer can use APEX_INSTANCE_ADMIN.ADD_SCHEMA to add them in a script. Obviously this would also have to be done on the production system. Note that if you had code that referenced the function "USER", it would still not be the applications user. They would get APEX_PUBLIC_USER or the ...
