Documentation - Oracle APEX

The encoding of pages in App Builder is determined by the character set of the Database Access Descriptor (DAD) used to access Oracle Application Express. For example, if the character set of the Database Access Descriptor is AL32UTF8, all pages in all applications in the Oracle Application Express user interface are encoded in UTF-8.

Managing Application Attributes - Oracle

The best way to get started with the Oracle APEX App Builder is to build an app. First, let's determine what kind of data you want to build your application on. You can easily create apps based existing tables you already have, based on data in a spreadsheet, or based on an entirely new data model. Explore the

videos below that walk you through each scenario and teach you how to start using the App Builder.

Oracle Application Express - Downloads

Oracle Application Express (APEX) Empower citizen and professional developers to focus on solving business problems rather than worrying about the underlying platform. Oracle APEX uses low-code development to let you build data-driven apps quickly without having to learn complex web technologies.

Application Express Application Builder User's Guide ...

In addition, all privileged application users (database users) would need to be assigned as valid schemas to the workspace, otherwise the above procedure would prevent switching to

that database user. The customer can use APEX_INSTANCE_ADMIN.ADD_SCHEMA to add them in a script. Obviously this would also have to be done on the production system. Note that if you had code that referenced the function "USER", it would still not be the applications user. They would get APEX_PUBLIC_USER or the ...

Oracle Application Express (APEX) is a low-code development platform that enables you to build scalable, secure enterprise apps, with world-class features, that can be deployed anywhere. Using APEX, developers can quickly develop and deploy compelling apps that solve real problems and provide immediate value. You won't need to be an expert in a vast array of technologies to deliver sophisticated solutions.

Application Express App Builder User's Guide - Oracle

If an APEX application has set the Application Primary Language to 'German (Switzerland)(de-ch)', there are unnecessary TAB characters in the strings in certain constellations when downloading an Interactive Report as CSV. This then cause client tools such as Excel to not be able to read the CSV data correctly.
