Configuring Oracle Application Server Web Cache

Oracle® Application
Server Web Cache
Administrator's Guide
10g Release 2 (10.1.2)

B14046-05 February 2006
Oracle Application
Server 10g Security
- Oracle Web Cache

Oracle Web Cache •
Oracle Web Cache is
a secure reverse
proxy cache and a
compression engine
deployed between •
Browser and HTTP
server • Browser
and Content
Management server
to improve the
performance of web
sites by caching
frequently accessed
content • Oracle
Web Cache supports
Configuring Oracle Web
Cache for Caching a Java EE
Application
Application Server 10g (9.0.4)

[Controlling the Server Header with Oracle HTTP Server and ...](#) Oracle Application Server 10g implements security features in each component from the Web Cache to the back-end database. When a user requests content (such as an employees pay records), the application must insure that the user can access this information, possibly by verifying a user password.

Oracle Application Server Web Cache

The Oracle Web Cache is one of the most important areas of Oracle9iAS tuning because of its important role in reducing cross-layer traffic. Because the Web Cache can keep HTML pages in RAM, the Oracle9iAS administrator can define sophisticated rules to govern the amount of RAM storage, the cacheability rules, and control Web Cache invalidations.

Oracle Internet Application Server provides a single integrated packaged solution of for middleware infrastructure including Oracle Containers for J2EE, Oracle Web Cache, Oracle HTTP Server, Oracle Forms, Oracle Reports, Oracle Portal and Oracle Discoverer. Also

included in this infrastructure are integrated security, management and integration technologies.

[OracleAS Web Cache Security - Oracle Help Center](#)

Oracle Web Cache is a content acceleration and assembly solution designed to scale the middle-tier infrastructure and improve end-user experience. By caching the frequently requested Web content in memory, Oracle Web Cache effectively offloads application servers and database from repeatedly processing those requests.

Oracle Application Server Web Cache | Oracle Community

To configure OracleAS Web Cache to work efficiently on a computer with paging, either deploy OracleAS Web Cache on a dedicated computer or reduce the maximum cache size and maximum cached object size from the Resource Limits and Timeouts page of Application Server Control Console (Web Cache Home page >

Administration tab > Properties > Web Cache > Resource Limits and Timeouts) or the Resource Limits page of OracleAS Web Cache Manager (Properties >

Resource Limits).
