Design and Develop Databases using Oracle SQL Developer and its feature-rich, powerful user-extensible interface with this book and eBook. Resources in Education John Wiley & Sons
* A proven best-seller by the most recognized Oracle expert in the world. * The best Oracle book ever written. It defines what Oracle really is, and why it is so powerful. * Inspired by the thousands of questions Tom has answered on his http://asktom.oracle.com site. It tackles the problems that developers and DBAs struggle with every day. * Provides everything you need to know to program

correctly with the database and exploit its feature-set effectively.

Oracle CRM On Demand Combined Analyses "O'Reilly Media, Inc."

This book describes how to use Oracle products to produce an end-user system. The back-end of the system is created first, using Oracle's PL/SQL capabilities. The front-end is then created using Oracle's Fusion Middleware, Forms and Reports Builder. This is a text book for a second-level database course.

SQL Tuning TeachUcomp Inc.

Motivala shows readers how to make the most of Form Builder and its components, build Forms and Forms Objects, create high-productivity layouts, and more. Next, users will master more sophisticated techniques, including Forms Triggers, multiform applications, alerts, and menus. Finally, they will master the fundamentals of Oracle Reports and discover how to do call reports directly from Oracle Forms.

Oracle Apress

Annotation Oracle Hyperion Interactive Reporting is one of many products in the Oracle Business Intelligence Enterprise Edition Plus software suite, an industry-leading business intelligence platform. The primary focus of the Interactive Reporting product is to provide strong relational querying and data analysis capabilities, where the software provides significant flexibility for creating custom dashboards, interfaces, and data analysis routines through the use of JavaScript programming and built-in software functionality. While Interactive Reporting is extremely flexible, performing advanced operations in the software is complicated and requires basic programming knowledge and an advanced understanding of the software. This book continues from where The Business Analysts Guide to Oracle Hyperion Interactive Reporting 11 completed and provides the reader with the information to

successfully execute the advanced features of the product along with examples and specific techniques applicable to everyday use. The Oracle Hyperion Interactive Reporting 11 Expert Guide provides software users and developers with many examples of the techniques used by software experts. The book begins with an introduction to leveraging advanced features of the project and an introduction to JavaScript. Dashboards are a major focus of the book with four chapters focused on building a simple to complex dashboard including functions, global objects, and syncing selections across dashboards. The book places an emphasis on learning methods for data analysis by using advanced programming and built-in functions, and a unique approach to using code to generate batch reports and exports is provided. The Dashboard Studio Optimize Utility and the Dashboard Studio Merge utility are explained in detail, and the approach to building and using a central code repository for use in dashboards and computations across multiple documents in an enterprise is demonstrated. This book will help the reader become an expert user of the software, providing the skills necessary to understand, communicate, and perform advanced level tasks. The authors experience in developing and supporting Interactive Reporting users is very apparent throughout each chapter of the book. While the book displays content and examples from version 11 of the software, the book is also applicable to previous versions of the software dating back to version 8, so

readers not currently using Interactive Reporting 11 will find the book applicable to daily use with the product.

Oracle Forms Interactive Workbook

McGraw Hill Professional

BI Consulting Group has developed what is recognized as the most complete, most comprehensive set of dashboard and report design â € œbest practiceâ € standards ever developed, specific to Oracle Business Intelligence (formerly Siebel Business Analytics). These best practices have not been created simply to provide a

â € œstandardâ € , instead they are based on the most important litmus test â € " what standards actually cause dashboards to be used, and what â € œbest practicesâ € of dashboard and report development

provide insight into the business, rather than just reports. This guide was started with the Siebel Analytics 7.8.x platform, before Oracle acquired Siebel. The current version of the guide reflects Oracleâ € ™s 10.1.3.3.x releases of Oracle Business Intelligence Enterprise Edition (OBIEE). Expect this guide to be enhanced and revised with subsequent major releases of OBIEE.

Oracle Reports 6I, 1 Packt Publishing Ltd

Using Table Aliases 3. Verifying the Database 4. Setting the Datasource Location 5. Mapping Fields

Oracle Cengage Learning

The world is experiencing unprecedented rapidity of change, originating from pervasive technological developments. This book considers the effects of such rapid change from within computing disciplines, by allowing computing educationalists to deliver a considered verdict on the future of their discipline. The targeted future, the year 2020, was chosen to be distant enough to encourage authors to risk being visionary, while being close enough to ensure some anchorage to reality. The result is a scholarly set of contributions expressing the visions, hopes, concerns, predictions and analyses of trends for the future.
