Oracle User Productivity Kit (UPK) is a software application used for developing training material. It excels at the rapid creation of simulations for software applications, but can also be used for creating printed documents such as user procedures and job aids. This latest book in the definitive Oracle UPK Development series expands upon and enhances the well-received UPK 11 version, with the inclusion of all of the new functionality introduced in UPK version 12.1 and its subsequent Enablement Service Pack 1. Oracle UPK 12 Development provides a guided approach to building high-quality, repurposable training simulations using Oracle's UPK platform. Through the course of its 17 chapters, the book guides UPK authors through the entire development process, from capturing an initial recording to publishing a complete, full-function, training-ready simulation. Oracle UPK 12 Development also teaches administrators and power users how to configure UPK through the use of Custom Templates, Style Sheets and Skins, before delving into advanced topics such as customizing the publishing documents and even building custom document types. Presented in a clean, visual format, with plenty of navigation aids, Oracle UPK 12 Development makes it easy to find the information you need, when you need it, and to apply

your new skills quickly and effectively. Oracle UPK 12

Development contains hundreds of full-color screenshots, and examples of every single button and icon in UPK, so you can easily relate what is being described to your own work. Dozens of hints, tips, and shortcuts are provided, to make sure that you can use the full power of UPK 12.1 efficiently and authoritatively. Oracle UPK 12 Development is designed for new authors looking for a quick start, experienced developers looking to improve their skills, and administrators who need to configure and customize UPK to meet their client's needs.

Annotation Oracle Hyperion Interactive Reporting is one of many products in the Oracle Business Intelligence Enterprise Edition Plus software suite, an industry-leading business intelligence platform. The primary focus of the Interactive Reporting product is to provide strong relational querying and data analysis capabilities, where the software provides significant flexibility for creating custom dashboards, interfaces, and data analysis routines through the use of JavaScript programming and built-in software functionality. While Interactive Reporting is extremely flexible, performing advanced operations in the software is complicated and requires basic programming knowledge and an advanced understanding of the software. This book continues from where The Business Analysts Guide to Oracle Hyperion Interactive Reporting 11 completed and provides the reader with the information to successfully execute the advanced features of the product along with examples and specific techniques applicable to everyday use. The Oracle Hyperion Interactive Reporting 11 Expert Guide provides software users and developers with many examples of the techniques used by software experts. The book begins with an introduction to leveraging advanced features of the project and an introduction to JavaScript. Dashboards are a major focus of the book with four chapters focused on building a simple to complex dashboard including functions, global objects, and syncing selections across dashboards. The book places an emphasis on learning methods for data analysis by using advanced programming and built-in functions, and a unique approach to using code to generate batch reports and exports is provided. The Dashboard Studio Optimize Utility and the Dashboard Studio Merge utility are explained in detail, and the approach to building and using a central code repository for use in dashboards and computations across multiple documents in an enterprise is demonstrated. This book will help the reader become an expert user of the software, providing the skills necessary to understand, communicate, and perform advanced level tasks. The authors experience in developing and supporting Interactive Reporting users is very apparent throughout each chapter of the book. While the book displays content and examples from version 11 of the software, the book is also applicable to previous versions of the software dating back to version 8, so readers not currently using Interactive Reporting 11 will find the book applicable to daily use with the product.

BI Consulting Group has developed what is recognized as the most complete, most comprehensive set of dashboard and report design â€œbest practiceâ€ standards ever developed, specific to Oracle Business Intelligence (formerly Siebel Business Analytics). These best practices have not been created simply to provide a â€œstandardâ€ , instead they are based on the most important litmus test â€œ what standards actually cause dashboards to be used, and what â€œbest practicesâ€ of dashboard and report development provide insight into the business, rather than just reports. This guide was started with the Siebel Analytics 7.8.x platform, before Oracle acquired Siebel. The current version of the guide reflects Oracleâ€™s 10.1.3.3.x releases of Oracle Business Intelligence Enterprise Edition (OBIEE). Expect this guide to be enhanced and revised with subsequent major releases of OBIEE.
