ExecuteCallbacksInOrder enables callbacks to be picked up in the order in which they were received by the BPEL process service engine for a given business flow instance. This setting impacts all SOA composite applications deployed in the BPEL process service engine.

Deploying and Managing SOA Composite Applications - Oracle

Hi, Honestly this piece of code is too large for a java embedding. I'd never use such a rather complex piece of code as a java-embedding. Your question here is actually an illustration of why I don't like it: it is too hard to figure out why it's not working through java embedding, you can't debug it.

Deploying and Managing SOA Composite Applications

Manage Oracle BPEL Process Manager The following section provides a summary of the steps required to monitor all BPEL process service components running in the BPEL process service engine. This section also provides links to documentation that describes key concepts and procedures.
